

Animal Match-Ups

Thank you for purchasing Playskool's Animal Match-Ups. Your child will enjoy mixing and matching the colorful pieces, while developing his or her hand coordination skills. We suggest that you join your child when he or she plays with Animal Match-Ups, to provide encouragement as your child learns how to fit the pieces together. Younger children are still enhancing their hand coordination skills, and may not be able to fit the pieces together properly at first. You can help your child by showing how to attach one piece to another piece. You and your child can have fun playing together, and you'll be creating a positive environment for developing fine motor skills.

Each animal has a molded-in "saddle" on its back. Kids can fit the character onto the "saddle" and take him for a ride!

Other ways to play with your child using Animal Match-Ups:

- You can also use Animal Match-Ups to teach colors, size relationships and shape matching. Ask your child to group pieces by color, or separate them into small or large sizes.
- Each piece has a molded-in geometric shape that your child will begin to recognize as he or she gets older. For another shape-matching activity, you can ask your child to group the pieces by these geometric shapes.

GEOMETRIC SHAPES

▲ = SEAL

◻ = FLAMINGO

◼ = ALLIGATOR
