

OBJECT OF THE GAME

Get four tokens in a row—up, across, or diagonally.

GET READY

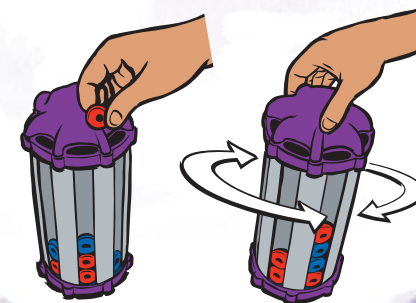

1. Set out the Connect-O-Round tower, tower lid, and tokens.
2. Put the lid on top of the tower and turn to fasten it shut.

3. Each player chooses a color and collects their tokens.
4. The player whose birthday is coming up next goes first.

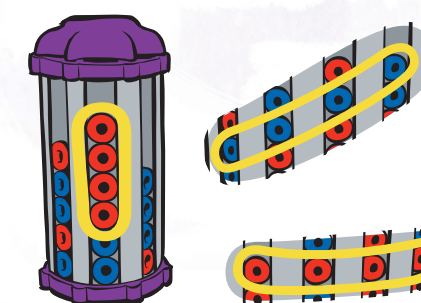

HOW TO PLAY

Take turns dropping one token at a time into the columns in the tower. Rotate the tower to see what's happening all around the game!

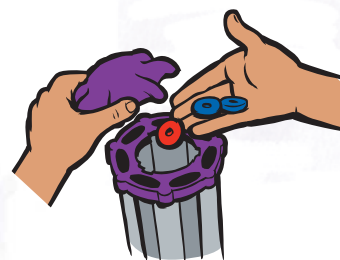

HOW TO WIN

The first player to get four in a row—up, across, or diagonally—wins!

When you're finished playing, just remove the lid to store your tokens inside the tower.
