

Baby Uh-Oh™ Instructions

Ages: 3 & Up

NOTE: You may need to adjust the temperature of the water to make the designs appear and disappear. If they do not appear, add more ice to the water to make it colder, and try again. If they do not disappear, try again with warmer water.

Feeding Baby

To fill the bottle, squeeze it under ice water. Insert the tip of the bottle into baby's mouth and squeeze the bottle to feed baby.

Putting a Clean Diaper on Baby

Place the "clean" diaper on a flat surface, with the light pink decorated side facing down. Lay baby on one half of the diaper. Bring the other half up between baby's legs, and attach the sides with the easy fasteners.

Changing Baby's Diaper

After baby drinks from the bottle, check her diaper. Uh-oh! It's wet — time to remove her "dirty" diaper and dress her in a "clean" diaper. Undo the easy fasteners to remove the "dirty" diaper.

Baby's diapers can be used again and again. To "clean" the diapers, dip them in warm water. Pat dry with soft cloth. **DO NOT** scrub them. Note: Stain fades but does not disappear completely.

Wiping Away Baby's Diaper Rash

Before putting on the clean diaper, wet the washcloth with warm water and gently wipe the diaper rash on her bottom to make it disappear. It re-appears when wiped with ice water.

Wiping Away Baby's Bandage

Baby has a boo-boo covered by a bandage. Wet the washcloth with warm water and gently wipe the bandage on her arm to make it disappear. It re-appears when wiped with ice water.
