Move your actual BattleBot's mouth pincers to activate your on-screen pincers to grab and chomp down - hard!!! - on your enemies!

V. THE TRUE ART OF PINCERS

Pincers are truly a work of art. Use your pincers to hold onto your enemies and drag them to the saw and hammer where destruction awaits them!

THOSE KILLSAWS CAN RIP THROUGH AN ENEMY LIKE A HOT KNIFE THROUGH BUTTER!

SMASH YOUR ENEMY UNDER THE WEIGHT OF THE HAMMER

I. INTO THE BATTLEBOX!

Does Mechadon have what it takes to battle his way to the championship? It's time to find out. Four of the world's most powerful machines, including EL DIABLO, KILLERHURTZ, VLAD the IMPALER, and MINION, stand between you and victory.

EL Diablo

Killerhurtz

Vlad the Impaler

Minion

II. THE ROBOT RUMBLE TROPHY

You must complete four rounds of championship battle (four stages of play) in order to advance to the battle royal, which is the final fight. In this final fight, you will face all four powerful machines at the same time. If you win (and that's a big if), you will be rewarded with the Robot Rumble trophy-the GIANT NUT- and will WIN the game.

III. LEVELS OF SKILL

Before you begin play, you can choose from three different skill levels:

EASY, MEDIUM and HARD.

No matter which skill level you select, you will always fight DIABLO in stage 1, KILLERHURTZ in stage 2, VLAD the IMPALER in stage 3, MINION in stage 4 and all four of them together in the fifth and final stage, which is the Robot Rumble.

IV. CONTROLLING YOUR BATTLEBOT

Roll your actual BattleBot forwards and backwards and your BattleBot on screen will move forwards and backwards, too!

Lean your actual BattleBot left and right and your BattleBot on screen will move left and right, too!

RULES OF ENGAGEMENT

- You must complete the first four rounds in order to advance to the Special Battle Royal final stage against all four powerful machines at once.
- Each enemy bot (EL DIABLO, KILLERHURTZ, VLAD the IMPALER, and MINION) has a unique weapon and different way of attacking you.
- The two techniques you possess are your pincers for holding and dragging your enemies to the hammer and saw - and your ability to ram your opponent to smithereens!
- You have two kinds of energy levels: ARMOR and CRITICALS.
- Your ARMOR level is reduced whenever you are attacked. After each stage of play, your armor is restored to full to begin the next stage. When your armor level drops down to zero, then subsequent hits will register from your criticals level.
- Your CRITICALS level drops whenever you are attacked by the saw or hammer -and whenever your ARMOR has been completely knocked out. Once your criticals are knocked out, you LOSE the match. If you survive a stage, your damage will transfer from the previous stage. If your criticals were below 75% at the end of a successful stage, you will automatically repair them back up to 75% as the next stage begins.
- Each stage begins with a countdown of "Three, two, one!".
- Each stage ends after 3:00 minutes of play unless a bot is knocked out before then. If a stage goes the "distance" of 3 minutes, then the bot that has taken the least amount of damage wins. So if you've taken less damage than your opponent, you move on to the next round of play!
- You will be awarded the SPECIAL ROBOT RUMBLE trophy if you win the fifth and final stage of play.
