

Remove all pieces from plastic frames. If you have difficulty, use safety scissors.

CONQUEST X-30 INSTRUCTIONS

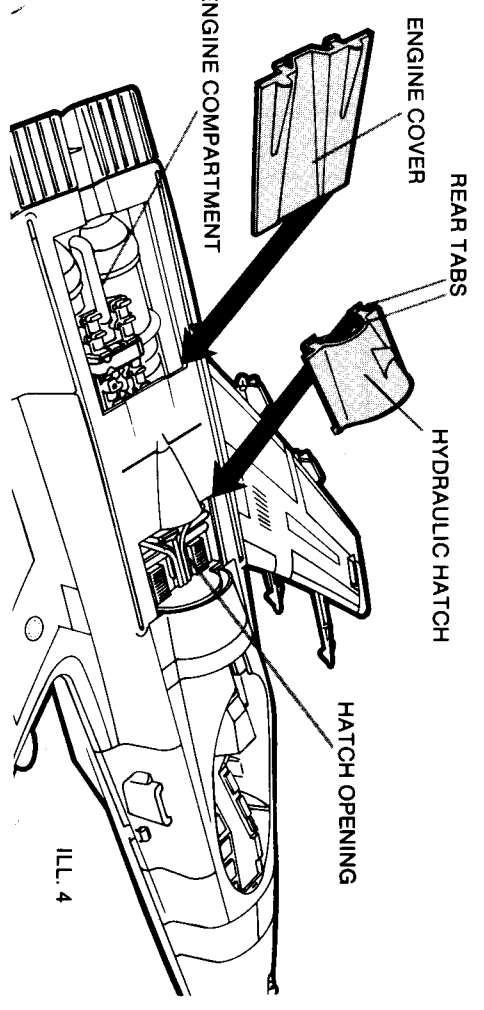

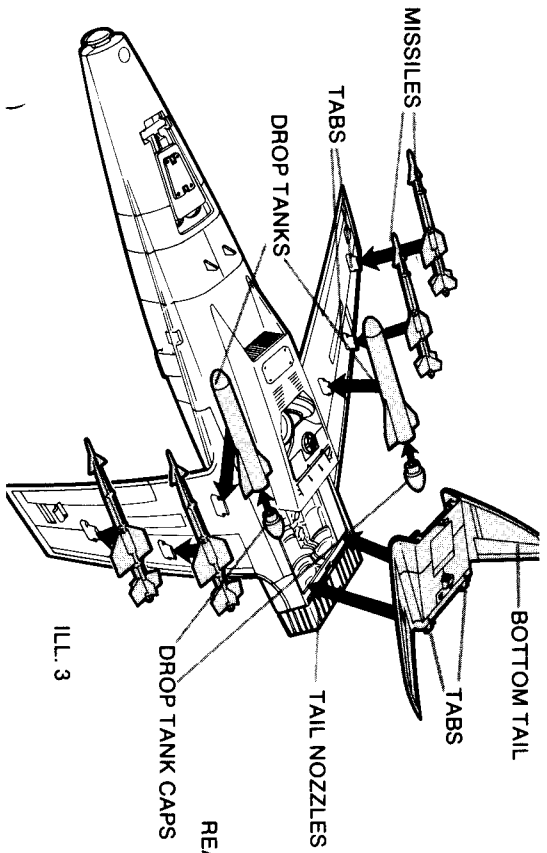

WIDE END OF STRUT PANEL

1 Insert large hubs into large tires. Turn jet upside down and lift main gear assembly. Snap hubs over axles on main gear assembly. (ILL. 1)

2 Insert small hubs into small tires. Lift front strut. Push hubs into holes in strut axle. With wide end nearest wheels, snap hubs in strut panel over tabs on strut. Push front and rear landing gear down. (ILL. 2)
