Refer to FIGURE 1 for complete game setup. Insert the castle backdrop, enchanted character pawns and Belle & Beast pawn into plastic stands. Place the enchanted character and enchanted rose tiles on the gameboard as shown.

LET'S PLAY!

Youngest player goes first. Play passes to the left. On your turn, spin the spinner. What did you spin? Your turn ends after you've followed the direction below.

Belle Turn over any tile. If it's a human, place its matching pawn in front of you.

- Beast

If you've transformed an enchanted character and have the pawn, place it back on the platform. Otherwise, do nothing.

Magic Mirror

Look at any 2 tiles. If you find any human characters, transform their enchanted objects by placing their matching pawns in front of you.

Enchanted Character

Turn over 1 of the 3 matching tiles. If it's a human, place its matching pawn in front of you. If it's a rose, do nothing. Put all tiles back enchanted-side up.

NOTES:

- If you spin a character another player has AND you find the human tile, you may take the pawn from the other player.
- If you spin a character that you already have, spin again and try to get a different character. If you don't spin someone new, your turn ends.

WINNING

When the players have taken all 5 pawns from the platform, it's time to try to turn the Beast back into the handsome Prince. Whoever reveals the Prince wins!

The player who takes the last pawn turns over one enchanted rose tile for each enchanted pawn she collected.

- If she reveals the Prince, she WINS!
- If she doesn't find the Prince, the next player to the left turns over one enchanted rose tile for each of her pawns, and so on. (If a player has not collected any pawns, she may not turn over any rose tiles.)

Fairy Tale Ending

All players now place their pawns back up on the palace platform, with their human sides revealed at last! The winner transforms the Beast into the handsome Prince by turning the Belle & Beast pawn around.
