

Includes: Canopy, mortar cannon, three mortar missiles, antenna, side machine gun, bumper, laser cannon, 4 treads, 4 wheels.

1 Slide green wheel onto axle with flat side facing vehicle, then press black tread onto axle as shown. Repeat step with remaining axles. (ILL.1)

2 Snap black canopy hinge into slot at front of tan body. Close black canopy as shown. (ILL.2)

3 Press hinge on tan mortar cannon into slot on tan cannon platform. Cannon will pivot up and down as shown. (ILL.3)

4 Place bottom of green bumper into slots at front of vehicle. Swing bumper up and snap green prongs onto tan posts as shown. (ILL. 4)

5 Press green turret peg into hole on top of vehicle as shown. (ILL.5)

6 Snap pegs on green laser cannon into slots in green turret as shown. (ILL.6)

## SIDE MACHINE GUN INSTALLATION

## ANTENNA INSTALLATION

## MORTAR MISSILE STORAGE

## HOW TO SHOOT MORTAR CANNON

**7** Press peg on side green machine gun into hole in platform on black canopy (ILL.7)

**8** Insert peg at base of green antenna into slot on top of black canopy. (ILL. 8)

**9** When not in use, place green mortar missiles into storage area as shown. (ILL. 9)

**10** If missile appears bent, be sure to straighten before dropping into cannon. **KEEP FACE AWAY FROM MORTAR CANNON AT ALL TIMES.** Drop green mortar missile into front of tan mortar cannon. Make sure missile stem protrudes from base of mortar cannon. To fire, pull on missile stem then release. (ILL. 10) **CAUTION:** Do not point missiles at eyes or face.

**NOTE:** If missiles become stuck inside cannon, remove cannon from cannon platform and shake missile out.

Peel and apply labels as shown.
