

1. Bend back posts on both axles as shown. (INSET) Slide front axle through front wheel wells, then fit holes in axle over posts on body bottom. Repeat process for rear axle assembly.
2. Fit posts on brush bar into notches in front end of body bottom. Snap body top onto body bottom. Fit tabs on hubcaps into holes in wheels. (4) Fit wheels over axle tabs. (ILL. 2)
3. Snap tabs on support arms into loops in platform. (Short arms are in the front) Fit tabs on platform base into holes in body top. Fit missiles (6) onto tabs on missile platform. Snap hatch cover onto hatch. (ILL. 3)
4. With barrel facing cockpit, fit post on laser cannon into key hole in right front fender. Swivel cannon away from cockpit. Snap roll bar into holes around cockpit. Snap front laser guns into holes in front end of body. (Guns should move horizontally). (ILL. 4)
5. Turn control unit upside down. Snap posts on legs into slots on legs facing inward. (ILL. 5)
6. Snap rear cannon top onto cannon bottom. (INSET) Snap tabs on gun turret into hole in control unit. Snap posts on gun into slots in turret with barrel facing opposite foot pegs on turret. Flip up legs on control unit and place unit onto body. (ILL. 6)
7. Fit Battle Force 2000 figure into front cockpit. (Eliminator driver, BLOCKER™, sold separately). (ILL. 7)
8. Detach control unit emplacement from Eliminator and swing legs down into position. (ILL. 8)

FUTURE FORTRESS INSTRUCTIONS:

Collect all 6 Battle Force 2000 vehicles to form the ultimate stronghold . . . Future Fortress™!

The six prototype attack vehicles combine to form the most indestructible stronghold in the world . . . the Battle Force 2000 Future Fortress™! Dominator's side walls open, creating the fortress' battle emplacements. With the emplacements secured, Vector's battle turret jettisons from the fighter and lands in between the wall to form the corner! To safeguard the left emplacement with flank firepower, Sky Sweeper's Sentry Post stands guard behind the emplacement with its powerful cannons poised for action! While providing tactical air cover during the fortress' "link-up" operations, Victorator's rocket sled is ejected from the craft and deployed on the fortress' northeast flank! Marauder's tank churns through the mud to secure itself behind Dominator's right battle emplacement, ready to open fire on the Cobra invaders! Just as Marauder's tank assumes its battle station, Eliminator's highly lethal battle platform moves in behind the tank to complete the fortress' formation! With Battle Force 2000's futuristic combat capabilities, G.I. Joe can destroy Cobra™ once and for all!
