

Magic Puff Art

Let's Draw!

Using Koosh® Creative™
Magic Puff Art™

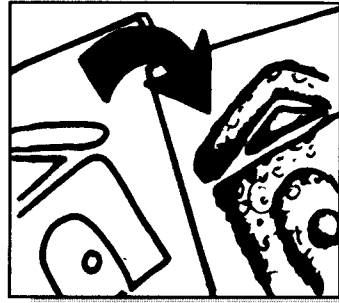

Important Tip:
Your water marker needs to
be moistened! Please see
instructions on page 3
before you begin.

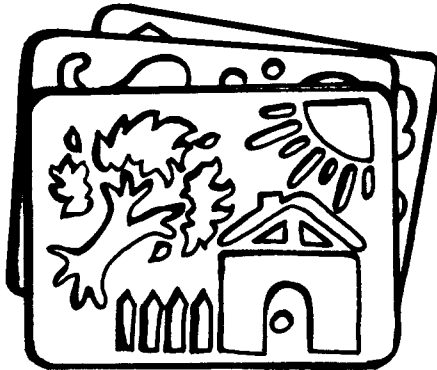

Koosh® Puffing "Tiles"

You can create exciting 3-dimensional art with your Koosh® Puffing Tiles. You can puff up images wherever you want by using the Koosh® Water Marker.

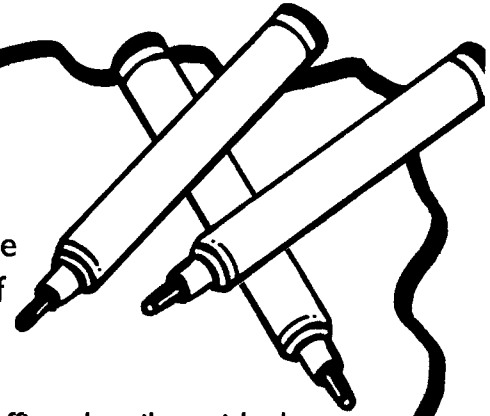

Koosh® Stencils

Add detail to your pictures by using any of the images on the Koosh® Stencils. You can create a bouquet of flowers with the garden stencil, an ocean of wonder with the sea stencil, and landscapes with our home stencil.

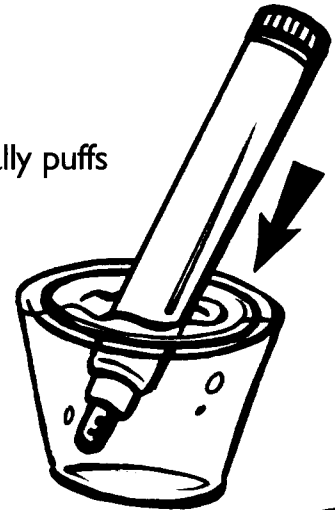

Koosh® Markers

Koosh® Markers won't puff your tile so they're perfect for creating all of your creative pictures. Use the markers with the stencils or draw anything you can imagine before puffing the tiles with the water marker. **Tip:** You can also add brightness to your pictures after you've puffed the art and allowed them to dry by going back over the puffed areas with the same color.

Water Marker

The Koosh® Water Marker magically puffs the tiles into 3-dimensional art! It's as simple as taking the water marker and dipping the tip into a small glass of water for 5 minutes. Then, just dab it onto any area of your art tile that you want "puffed".
