INTRODUCTION

You are holding in your hands one of the most addictive, brain boggling games ever created. **The object of the game is simple - turn the LIGHTS OUT.** If you press a button that is lit, it will shut off. If you press an unlit button, it will light up. Sounds easy, right? The **challenge** is that every press of a button has an effect on the surrounding buttons. When you press a button, it not only changes that light, but it also changes the adjacent lights (those that are directly above, below, or next to the pressed button).

LIGHTS OUT contains thousands of different “puzzles.” Each puzzle begins with a different pattern of lights on the keypad. Your **goal** is to solve each puzzle (turn all the LIGHTS OUT) by pressing as few buttons as possible.

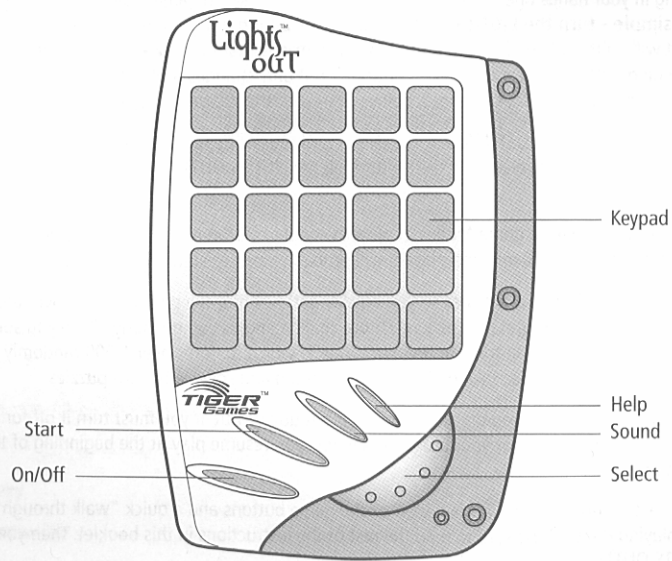

LIGHTS OUT has three different game Modes of play. The goal in all three Modes is the same, but each Mode provides a different challenge. Beginning players will probably want to start with Mode 1.

The first few puzzles in Mode 1 are easier, so you quickly get a feel for the game and discover the basic “logic” of LIGHTS OUT. Puzzles get progressively more challenging as you go along. Once you solve some of the 50 puzzles in Mode 1, you can try your hand at Mode 2, which features over 1,000 randomly selected puzzles. Or, for a real mind-bender, take on Mode 3 to program and solve your own puzzles.

LIGHTS OUT is so addictive that you may not want to put it down! But, if you must turn it off for any reason, the memory function keeps track of your progress, and lets you resume play at the beginning of the puzzle you were trying to solve.

What follows next in this booklet is an overview of the game buttons and a quick “walk through” of the first puzzle. After playing Puzzle 1, be sure to read the rest of the instructions in this booklet. Then you can really turn the LIGHTS OUT!

A Look at the Game Unit

Buttons

ON/OFF – Press to turn the game ON or OFF.

(Your game will shut off automatically after 3 minutes of non-use.)

START – Press to automatically begin a game in Mode 1.

(or)

- Confirm a selected puzzle in Mode 1 or 2.
- Confirm a puzzle you programmed in Mode 3.
- Restart a puzzle you've been trying to solve.

SELECT – Press to choose Mode 1, 2, or 3. (Game levels)

(or)

- Exit the current puzzle (and go to another Mode).
- Select a previously solved puzzle in Modes 1 or 2.

SOUND – Press to turn the sound on or off.

HELP – Press for guidance from the computer at the beginning of a puzzle. The computer will show you the best possible light to press for your first move, and then automatically make that move for you.

You may press HELP again for the second move. After that, you are on your own!

Important: The HELP button will only assist you with the first 25 puzzles in Mode 1 and 2. It will not help you with more advanced puzzles. The HELP button does not function in Mode 3.

Note: Once a player has pressed a button on the keypad, the HELP feature is disabled until the puzzle is solved or restarted.

QUICK-PLAY GAME

(Puzzle 1)

This section shows you how to play LIGHTS OUT right away! You may then catch up on the other instruction details later.

Object of the Game

Turn all the LIGHTS OUT on the keypad by pressing as few buttons as possible. If you press a button that is lit, it will shut off. If you press an unlit button, it will light up. Pressing a button also changes the *adjacent* lights (those that are directly above, below, or next to the pressed button).

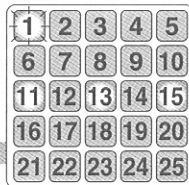

Modes of Play

LIGHTS OUT contains three different game play Modes. These Modes will be explained in detail later. This Quick-Play game is the first puzzle in Mode 1.

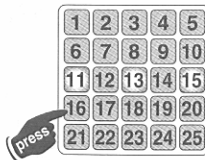

Getting Started

- Press the **ON button** to turn on the game. You will see a pattern of lights quickly moving around the keypad. This is followed by the appearance of a cross pattern of lights on the keypad.
- Press the **START button**. If this is your first time playing, you will see the button in the upper left corner of the keypad begin blinking. You will then see three buttons in the middle row light up. (See diagram at the top of page 6.) This is Puzzle 1. Now you must try to turn all the LIGHTS OUT by pressing as few buttons as possible!
- Follow the directions on page 6 to solve Puzzle 1. It will take a minimum of six "steps" to solve this puzzle. In other words, you will have to press *at least* six light buttons to turn all the LIGHTS OUT.

To begin, take a look at the keypad. Each button on the keypad is assigned a number from 1 to 25, as shown on the adjacent diagram. Since your goal is to turn all the LIGHTS OUT by pressing the fewest possible buttons, you need to think about which buttons to press. Now, let's use the button numbers to solve this puzzle step by step.

Solving Puzzle 1

Step 1:

This diagram shows that buttons 11, 13 and 15 are lit. Press button 16. This shuts off button 11, but lights up buttons 16, 17 and 21. Buttons 13 and 15 stay lit.

Step 2:

Press button 18. This lights up buttons 18, 19 and 23, but turns off buttons 13 and 17. Buttons 15, 16 and 21 stay lit.

Step 3:

Press button 20. This lights up buttons 20 and 25, but turns off buttons 15 and 19. Buttons 16, 18, 21 and 23 remain lit.

Step 4:

Press button 21. This lights up button 22, but turns off buttons 16 and 21. Buttons 18, 20, 23 and 25 remain lit.

Step 5:

Press button 23. This shuts off buttons 18, 22 and 23. Buttons 20, 24 and 25 remain lit. You have three lights to go!

IMPORTANT: Notice that the lit buttons are now in a corner of the keypad. It is strategically important to get the lit buttons over into a corner like this. With fewer adjacent lights, it makes it easier to shut them all off!

Step 6: Your final move! The only lit buttons on the keypad are 20, 24, and 25. Press button 25. Congratulations! You've turned all the LIGHTS OUT in only six moves! You will see a victory "show of lights" flashing around the keypad! Now you can move on to Puzzle 2.

Remember, there are thousands of different puzzles waiting to challenge you in three different game Modes, so you've only just begun! The remaining instructions explain how to solve harder puzzles in Modes 1 and 2. You can also program your own puzzles in Mode 3!

Selecting Puzzle Modes

Now that you have solved Puzzle 1 in Mode 1, it's time to learn more about each of the three puzzle Modes.

Mode 1: This Mode gives you 50 different pre-programmed puzzles - each one progressively more difficult. Each puzzle must be solved in order.

Mode 2: This Mode randomly selects 50 different puzzles from more than 1,000 puzzle possibilities. Each puzzle is progressively more difficult and must be solved in order.

Mode 3: This Mode lets you program your own puzzles using the charts found in the last section of this booklet. Or, use your imagination to create your own puzzles!

MODE 1

The first 5 puzzles in Mode 1 may be solved in as few as 6 steps, while the more advanced puzzles will require a minimum of 15 steps. See the adjacent step chart. Remember, you must master each puzzle in order before you can move on to the next one.

Puzzle

Puzzles 1-5
Puzzles 6-10
Puzzles 11-15
Puzzles 16-20
Puzzles 21-25

Puzzles 36-40
Puzzles 41-45
Puzzles 46-50

Minimum Steps

11 steps
12 steps
13 steps
14 steps
15 steps

To begin play in Mode 1, do the following

- Press the ON button.
- Press the START button. In a few seconds, the game will automatically go to the puzzle you must complete. (If you have completed Puzzle 1, then the game will bring you to Puzzle 2.)

The light briefly blinks on button 2. This indicates Puzzle 2 in Mode 1.

Puzzles 1 -25:

To identify each of the first 25 puzzles, one blinking light will briefly appear on the button that matches the puzzle number. For example, button 1 blinks at the beginning of Puzzle 1. Button 2 blinks at the beginning of Puzzle 2. This is illustrated in the adjacent diagram.

The light briefly blinks on button 3. Button 25 is lit. $25+3=28$. This indicates Puzzle 28.

Puzzles 26 -49:

To identify each of these puzzles, one light will briefly blink on buttons 1-24, and button 25 will stay lit for a moment. To determine the puzzle number, simply add the blinking button number to 25. This is illustrated in the adjacent diagram.

Note: Puzzle 50 is indicated by button 25 blinking and then staying lit for a moment.

MODE 2

Mode 2 randomly selects 50 puzzles from more than 1,000 puzzle possibilities. When you finish the first 50, the game chooses another 50 from the 1,000. Each puzzle is assigned a number (1-50) based on the minimum number of steps it takes to solve. As in Mode 1, each puzzle must be solved in order.

For example, Puzzle 1 in *Mode 1* will always be the same. However, Puzzle 1 in *Mode 2* will almost always be different, although the step level will always remain the same.

Select Mode 2 by doing the following

- Press the ON button.
- Next, press the SELECT button. Keypad button 1, 2, or 3 will begin blinking. Choose Mode 2 by pressing the SELECT button until keypad button 2 is blinking.
- Then, press the START button.

Note: When you switch from Mode 1 to Mode 2, your new puzzle will have the same number (and the same level of difficulty) as the puzzle you last completed in Mode 1. Of course, the puzzle configuration will be different.

For example, if the last puzzle you completed in Mode 1 was Puzzle 12, you will start off with a new Puzzle 12 in Mode 2.

Keep Button Pressing to a Minimum

As stated earlier, the challenge of LIGHTS OUT is trying to solve each puzzle in as few steps (button presses) as possible. If you exceed the minimum number of necessary steps, the number of extra steps you took will flash on the keypad. For example, solving a 6-step puzzle in 8 steps will result in 2 blinking lights.

You may still proceed to the next puzzle as long as you do not exceed the minimum number by *more than 10 steps*. If you take more than 10 steps beyond the minimum to solve a puzzle, a lighted "X" pattern will appear on the keypad. You will have to try again before advancing to the next puzzle!

Returning to a Completed Puzzle

After you've solved a puzzle in Mode 1 or 2, you can try to improve your score by returning to that puzzle again. (You must be "in" a puzzle before you can return to a previously completed puzzle.) Here's how:

- While you are in a puzzle, press the SELECT button. This will turn out all the lights on the keypad.
- Next, press the button number of the puzzle you want (1-25).
- Then, press the START button.

To return to completed puzzles 26-49, do the following:

- While you are in a puzzle, press the SELECT button. This will turn out all the lights on the keypad *except button 25*.
- Next, press the button number (1-24) that, *when added to button 25*, equals the puzzle number you want.
- Then, press the START button.

For example, let's say you are in puzzle 35 and want to return to completed puzzle 29. After pressing the SELECT button, all lights on the keypad will go out except button 25. You would press button 4 because $25 + 4 = \text{Puzzle 29}$.

Choosing a More Challenging Puzzle

As stated earlier, to access a more challenging puzzle, you must select it in numerical order. For example, if the last puzzle you completed was Puzzle 12, you could not select Puzzle 14 until you solved Puzzle 13.

MODE 3

Here is where you program your own puzzles to challenge yourself and your friends! Of course, you'll have to figure out how to solve them too, so don't get too tricky!

Select Mode 3 by doing the following

- Press the ON button.
- Next, press the SELECT button. Keypad button 1, 2, or 3 will begin blinking on the keypad. Choose Mode 3 by pressing the SELECT button until keypad button 3 is blinking.
- Then, press the START button.

You may then press any series of buttons on the keypad. Each time a button is pressed once, it will light up. When you have finished creating your puzzle pattern, press START again to begin turning all the LIGHTS OUT.

Programming Charts

It is possible to create a puzzle so difficult that it may not have a solution! That is why we have provided 1,000 puzzles for you to program and use. The last section of this booklet will list those puzzles with the minimum number of moves it takes to solve them, starting with 6-step puzzles. To program a puzzle, simply push the buttons listed for each puzzle and then press the START button.

GAME MEMORY

When you turn off your game, the memory function keeps track of your progress. You may later resume play at the beginning of the puzzle you were trying to solve.

To do this, simply follow the previous directions for entering Mode 1 or Mode 2.

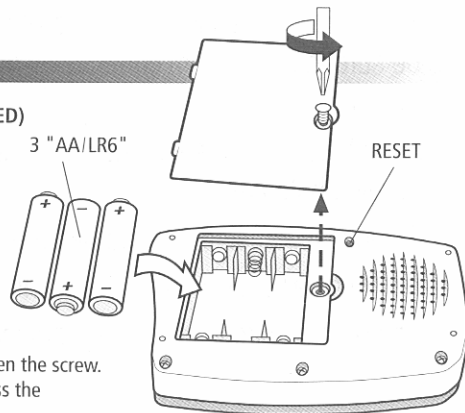

Note: The memory feature does not function in Mode 3. Also, the game will reset to Puzzle 1 when the batteries are removed for replacement.

Batteries

3 "AA/LR6" Batteries Required (NOT INCLUDED)

To replace the batteries, do the following:

1. Use a Phillips head screwdriver to loosen the screw on the battery compartment on the back of the unit and open the door.
2. Carefully remove the old batteries. (Do NOT use a metallic object to do this.)
3. Insert 3 "AA" or "LR6" batteries, making sure to align the "+" and "-" as shown.
4. Replace the battery compartment door and tighten the screw.
5. In case the game malfunction or "locks up", press the **RESET** button to initialize the unit.

Your game will reset to Puzzle 1 in Mode 1 after you have replaced or removed the batteries.

Maintenance

- Handle the game carefully,
- Store the game away from dusty or dirty areas.
- Keep the game away from moisture or temperature extremes.
- Do not disassemble the game. If a problem occurs, remove and replace the batteries to reset the game.

CAUTION:

1. Always follow the instructions carefully. Use only batteries specified and be sure to insert them correctly by matching the + and – polarity markings.
2. Do not mix old batteries and new batteries, or standard (carbon-zinc) with alkaline batteries.
3. Remove exhausted or dead batteries from the product.
4. Remove batteries if product is not to be played with for a long time.
5. Do not short-circuit the supply terminals.

6. Should this product cause, or be affected by, local electrical interference, move it away from other electrical equipment. Reset (switching off and back on again or removing and re-inserting batteries) if necessary.
7. RECHARGEABLE BATTERIES: Do not mix these with any other types of battery. Always remove from the product before recharging. Recharge batteries under adult supervision. DO NOT RECHARGE OTHER TYPES OF BATTERIES.
8. Do not dispose of batteries in fire. Battery may explode or leak.
9. Make sure the batteries are inserted correctly and follow the toy and battery manufacturer's instructions.

Caution/Defect or Damage

High temperature will destroy the unit. Do not leave unit in direct sunlight.

Do not use a pencil or pin to press the RESET switch. Use a ball-point pen.

Clean only with a piece of soft dry cloth.

Do not press the liquid crystal display and avoid heavy shock or the display may fail.

If Lights Out ® Game is damaged or something has been left out, DO NOT RETURN IT TO THE STORE. The store doesn't have replacement parts. Instead, write to us at:

Hasbro Inc.
PO Box 200, Pawtucket, RI 02862

In your note, mention the name of your game, its model number, and tell us briefly what the problem is. Also include sales slip, date, place of purchase and price paid. We will do our best to help.

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
