## BRAIN STATION™

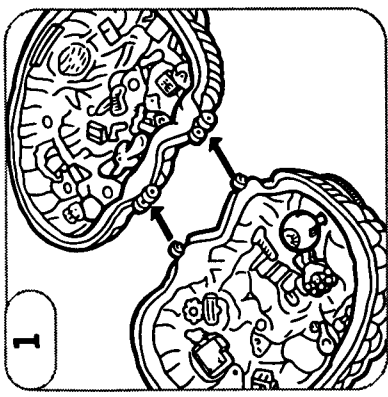

Thank you for purchasing this exciting, hands-on toy from Kenner. For maximum enjoyment of this toy, please be sure to read and follow the instructions carefully. If you have any questions, comments, or need additional information concerning this product or its parts, please call our Kenner Consumer Service hotline at 1-800-327-8264, Monday through Friday, 8:00 AM to 5:00 PM Eastern Time.

Includes: brain, nerve bridge, whistling ear, nose, movie camera, textured porcupine, removable eyeball, Keesha, Ms. Frizzle, lots of attached play parts and Body Safari guide.

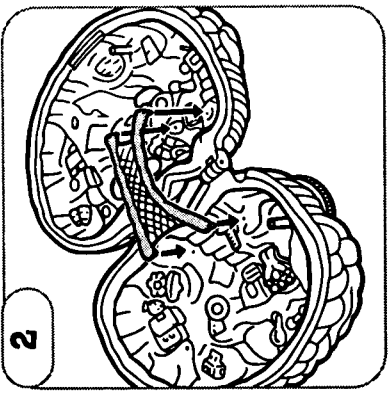

# ASSEMBLY

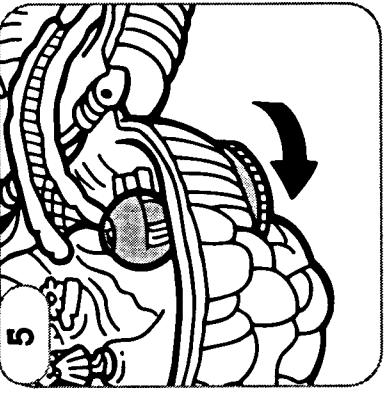

# PLAY FEATURES

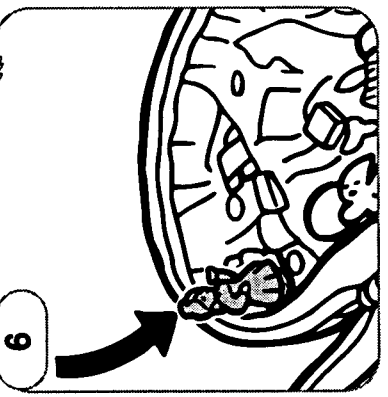

Snap halves of brain together as shown. The Brain Station comes with 6 loose pieces - a nerve bridge, tethered ear whistle, scented nose, spinning eyeball, textured porcupine and movie camera.

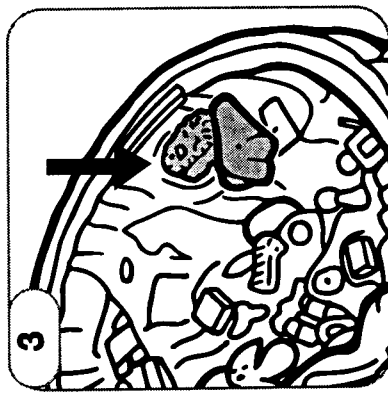

Fit endings of nerve bridge into holes on both halves of brain.

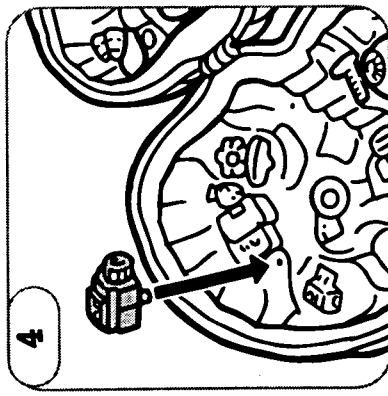

Turn the thumbwheel to spin the eyeball all around...it's quite a sight!

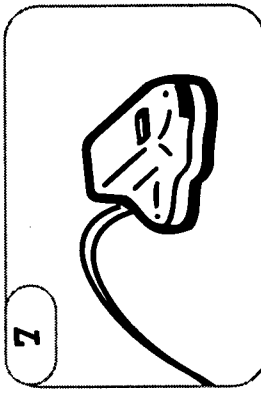

Send Keesha or Ms. Frizzle through one of the 2 tunnel entrances, and watch them come out the other side!

Fit nose over pin, and place porcupine nearby as shown.

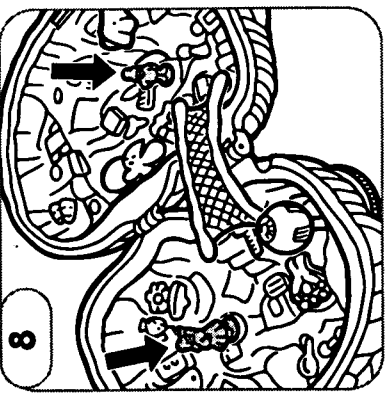

Fit post on movie camera into hole as shown.

Blow into the tethered ear to make a whistling sound! **IMPORTANT:** Due to choke hazard, ear must remain tethered to inside of brain. **DO NOT** attempt to detach ear and **DO NOT** allow a child to blow into the ear if it should become detached from the brain.

- Test your sense of smell and sniff the scented nose!
- CAREFUL! DO NOT** try to eat this piece, and do not place this piece or any other in your mouth!

- Stand figures in the recessed circles so they can explore the brain!
- Walk across a bridge of nerves with Keesha and The Friz!
- For the sense of touch, feel the textured porcupine.
- Capture visual memories with the video camera.

The brain is a very busy place. It acts as our body's center of learning and is the command station that controls our body's actions and reactions. Inside the Brain Station are play pieces that indicate jobs performed by the brain. The play pieces are located in the same place as where the work happens in a real brain!

Try to find each of the following:

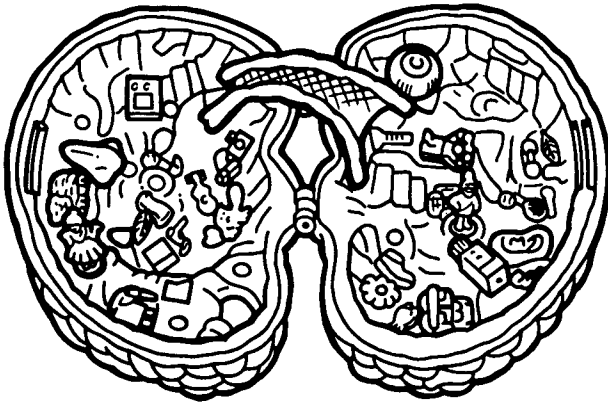

### Play Part

Law book & gavel  
 TV  
 Camera and film  
 Fish, sneaker, flower  
 Scale, feather & barbell  
 Motor  
 Microphone
