### ASSEMBLY INSTRUCTIONS

Perform steps in this order:

**Step 1.** Push the rim bracket through the hole from the back. Make sure it "snaps" in place. Then slide the metal clip in place from the back to secure the rim bracket to the backboard.

**Step 2.** Hoop and Net: Hold hoop with solid edge up and cored-out edge down. Determine which end of the net has the larger loops. Twist and loop the ends of the net over each back located on the inside of the hoop as shown. Tug each loop to secure it.

**Step 3.** Slide netted hoop into place as shown. Make sure the hoop snaps into the rim bracket before rotating the hoop up for play.

**Step 4.** Insert door bracket into backboard.

**Step 5.** Place door bracket with assembled backboard and net over the top of a door as shown.
