

# ↑ SOUND UNIT LOCATED HERE ↑

Ages 3 & Up

## INSTRUCTIONS

**IMPORTANT: BEFORE DISCARDING BOX, UNTIE AND DISCARD THE PLASTIC TIE AND REMOVE SOUND UNIT (INSTRUCTIONS BELOW).**

### PLAY INSTRUCTIONS:

1. The sound unit for your Pet is packaged in a special compartment inside the Pet carrier box. To remove sound unit, untie and discard the plastic tie and open tabs on compartment as shown.

2. The sound unit fits into your Pet's tummy pouch. There is a string cord inside the pouch to fasten the unit so it does not fall out during play. Thread the string cord through either of the side tabs and tie a knot as shown. Place unit in pouch as shown, with front speaker facing out. Gently squeeze or hug your puppy or kitty to hear it bark or meow!

**BATTERY REPLACEMENT:** The sound unit comes equipped with 3 A-76 button cell batteries. When they are exhausted, you may replace them with any of the following battery styles: 357A, A-76, SR-44 or PX-76. ALWAYS use three batteries of the same style – never mix different styles of batteries.

1. Battery replacement requires a Phillips® screwdriver (not included). Use the screwdriver to loosen (but not remove) the screw that secures the battery compartment opening.

2. Remove the battery door, discard the used batteries, and replace them with 3 new batteries. Replace the battery door and re-tighten the screw with the screwdriver.

### CAUTION:

1. As with all small batteries, the batteries included with this toy should be kept away from small children who still put things in their mouths. If they are swallowed, promptly see a doctor and have the doctor phone (202) 625-3333 collect.
2. When installing replacement batteries make sure the batteries are inserted correctly and follow the toy and battery manufacturers' instructions.
3. Never mix old batteries with new batteries, or standard (carbon-zinc) with alkaline batteries.
4. Batteries may explode or leak if recharged, disassembled or heated.
