FITTING

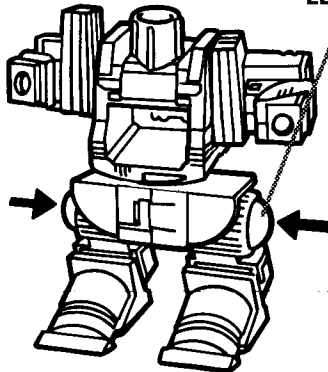

LEG

MAIN BODY

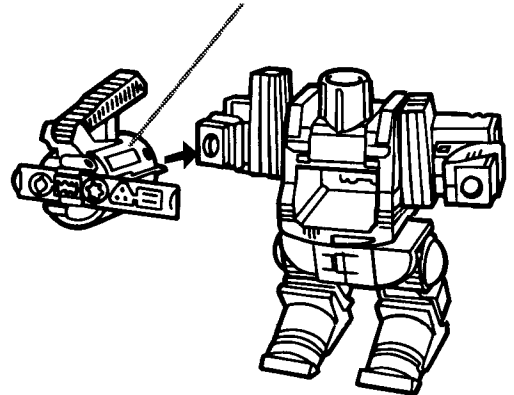

1. First, assemble the Doh-Bot figure's right leg, sliding the leg over the fitting underneath the Doh-Bot figure's main body piece from the side as shown.

LEFT LEG

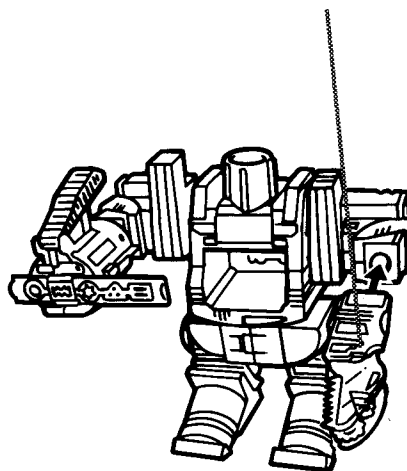

2. Now, assemble the Doh-Bot figure's left leg, once again sliding into place from the side, and locking the tabs on left leg into the slots on right leg as shown.

SHAPE SHOOTER® EXTRUDER

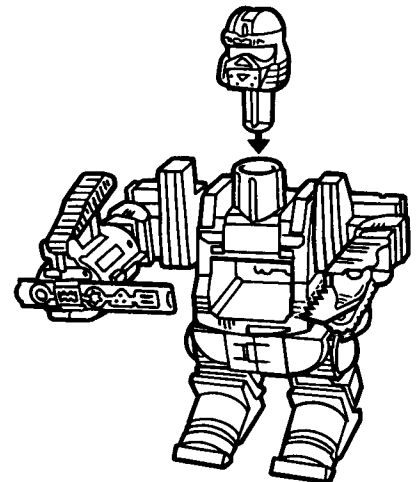

3. Snap the right arm "Shape Shooter" extruder into place. When assembled, the handle of the extruder should be on top as shown.

LEFT ARM SHAPE-CUTTER

4. Snap the left arm shape-cutter into place in the same way. Both, shape shooter extruder and shape cutter are removable to be used either as part of the Doh-Bot figure or as separate play pieces.

5. Finally, add the Doh-Bot figure's head (which is also a Play-Doh® brand plunger) and you've created an awesome robot factory! (The instructions for making robot molds are in full color on the back of this package.)
