

Demolition Derby™ Contents:

- 1 six-ounce can and
- 2 two-ounce cans (Total Net Weight 10 oz., 280 grams) of PLAY-DOH® Brand Modeling Compound
- Car-molding play base
- Demo derby launch pad with 4 motor molds
- 2 Auto frames with rolling wheels
- 2-Car-making molds
- 2-piece shape extruder with 5 different shapes
- Trimmer knife
- Label sheet
- Track adapter

PLAY INSTRUCTIONS:

CAR BOOK MOLDS:

1. Place 1 of the 2 auto frames with rolling wheels on the molding chamber of base. Load either auto mold (car or truck) with PLAY-DOH® compound; clear compound out of the wheel wells, flatten out excess, and attach auto mold to the molding chamber as shown.

2. Close the book mold over the chamber, and press down hard for best molding results. Open the book mold, and remove excess compound with trimmer knife. Remove molded vehicle, grasping it by wheels and wriggling it from side to side.

SHAPE EXTRUDER:

3. The 2-piece extruder can be used to make 5 different shapes: barrels, jersey barriers, speed bumps, street curbs, and decorative racing stripes for your cars!

EASY 3 STEP CLEAN-UP!

1. Place Play-Doh® Brand Modeling Compound back in can and seal lid.
2. Remove excess from carpets/fabrics, then allow remaining compound to dry.

MOTOR MOLDS:

4. The side of the launch pad has 4 different motor molds to place on top of your molded cars and trucks as shown.

CUSTOMIZE/DESIGN:

5. Place molded car or truck into slots on play base to hold it in place as shown. Now customize and decorate in any way you want! Use different compound colors and be creative!

DEMO DERBY LAUNCH PAD:

6. Place completed car or truck onto launch pad, and strike the launch lever to shoot your vehicle right off the launch pad! Set up obstacles with barrels and barriers and knock 'em down. Use the track adapter to connect launch pad to most 1.75 inch racing track
