NONTOXIC CONFORMS TO ASTM D-4236
Product and colors may vary.
Molded results may vary depending on child's age and level of skill.
Photos show items with some Play-Doh® colors not available in this set.

EASY 3-STEP CLEAN-UP!

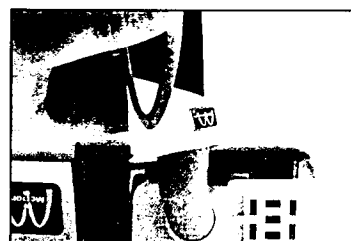

1. Place Play-Doh® Brand Compound back in can and seal lid.
2. Remove excess from carpets/fabrics, then allow remaining compound to dry.
3. Loosen dried compound with stiff brush and vacuum clean, if necessary, brush with gentle soap and cold water. (Do not use hot water or cleaning solutions to clean Play-Doh® compound from carpets/fabrics.)

4. Put the food and toy inside the box to complete your pretend Happy Meal!

3. Then, make any one of the six Happy Meal Toy molds (teddy bear, sea shell, star, etc.)

2. Slide the shapemaking strip into the extruder and line up the "shake" mold on strip. Extrude Play-Doh® modeling compound into the circle compound into cup to make a chocolate shake. Then, line up the "french fry" mold on the strip, extrude french fries, then put them inside the container!

1. Snap a food mold onto one of the molding handles on the Playshop base. Press a ball of Play-Doh® modeling compound into the circle platform underneath mold, then pull the arm down to make the mold. Make a hamburger with lettuce, onion and pickles, then wrap it up with one of the McDonald's wrappers!
