

One Stop Playshop™

ASSEMBLING DOORS TO PLAYSHOP BASE:

The 2 storage compartment doors should be assembled with the imprinted side facing up; the underside of the doors are marked "L" and "R" for left and right. Assemble the doors to the Playshop base by inserting posts on doors into slots on base (see front photo on package for reference).

1-800-PLAYSKL

FUN FACTORY:

1. Slide extruder into its slot on upper left side of Playshop. Slide a die strip into front slot of extruder and center a design over the opening.

2. Raise handle and fill compartment with PLAY-DOH® modeling compound. Using slow, even pressure, press handle down and use trimmer knife to trim extruded shapes.

3. Use the molds on the handle to make additional shapes. To remove the shapes, use a ball of modeling compound as shown.

ROLLER:

Knead a ball of modeling compound and place in top of roller. Turn handle in a clockwise direction to roll a flat sheet of compound.

COOKIE CUTTERS:

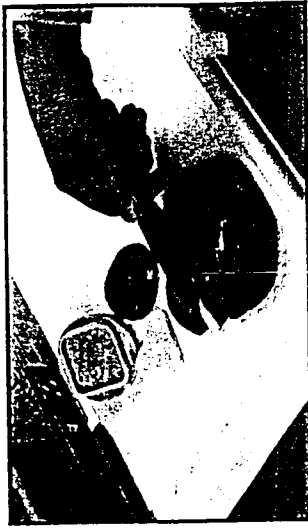

Press the cookie cutters into the flat sheet and trim excess compound to make a circle, square, star or triangle.

FACE PLATES:

The impressed areas on the right side of the play area hold the 2 face plates. Mix and match the plates and use flattened compound to make wacky face molds as shown.

TEXTURES:

The left side of the play area has 2 patterned areas to press textured compound shapes. Use the textures with your cookie cutter shapes or make your own designs!

STORAGE:

Your 3 cans of PLAY-DOH® modeling compound fit into the 3 storage slots at the top of the Playshop, and all play pieces fit into the 2 covered storage pockets.

CLEAN-UP:

When your child is finished playing, use a ball of modeling compound to pick up the small pieces of compound from the Playshop and play pieces. Replace compounds in their respective cans and seat lips tightly.

NONTOXIC CONFORMS TO ASTM D-4236-89
