MAKING PICTURES:

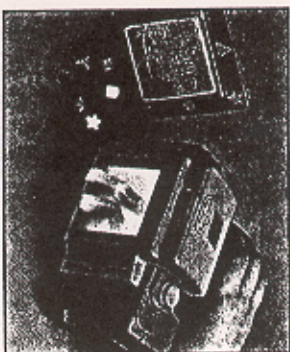

1. Press the top button as shown to open back frame of camera. Choose any 1 of the 8 photos on the tiles and place it in the frame, facing inside the camera.

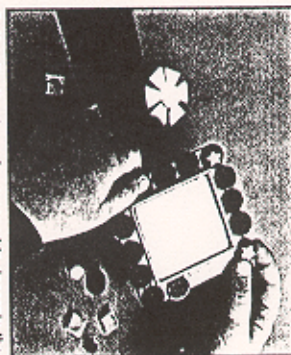

2. Turn lens of camera until it is extended all the way out. Then, place a ball of PLAY-DOH® Modeling Compound into lens cavity as shown, until cavity is completely filled.

3. Close the back frame of camera. Turn lens of camera back in, pressing the compound into the photo tile to create the picture. When you're done, remove the picture you've made and place it inside the frame!

4. There is also an additional tile for extruding 3 more fun shapes - triangle, square and star!

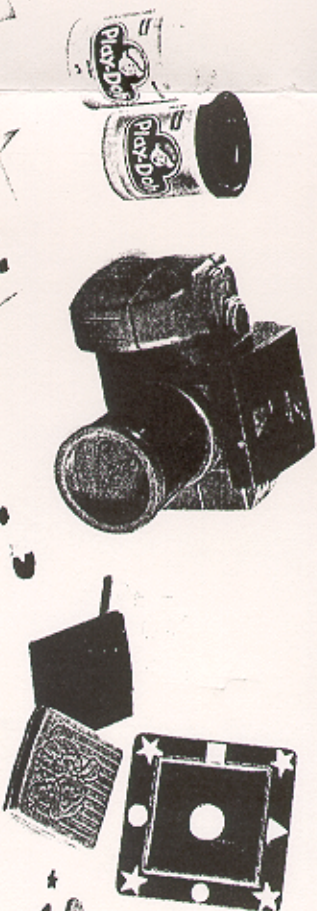

5. Use the 3 colors of compound to decorate the frame in any way you want, or create your own colorful frames from scratch! Use the shape extruder tile or the thumb extruder on the frame to create design touches.

6. For storage, all 5 tiles fit inside the slot in back of the camera (to keep tiles from falling out, keep all 5 inside the slot). The front of the lens also holds 1 can of PLAY-DOH® Modeling Compound for fun on the go!

DECORATING FRAME:

EASY 3-STEP CLEANUP!

1. Place Play-Doh® Brand Modeling Compound back in cans and seal lids.
2. Remove excess from carpets/fabrics, then allow remaining compound to dry.
3. Loosen dried compound with stiff brush and vacuum clean. If necessary, brush with gentle soap and cold water. (Do not use hot water or cleaning solutions to clean Play-Doh® compound from carpets/fabrics.)

NONTOXIC CONFORMS TO ASTM D-4236
