

Congratulations!

You are the proud
owner of a **DRINK 'N WET™**
Baby Pup!

To fill your puppy bottle, fill a sink with approximately 2 inches of water, hold bottle underneath water, and squeeze.

Once you have filled the bottle with water, feed your baby pup by placing the bottle's nipple inside puppy's mouth, and squeezing water out of bottle. Within several seconds after drinking, your pup will wet his/her baby diaper!

(Puppy Surprise Secret: If you would also like a **DRINK 'N BURP™ Baby Pup**, look for a puppy that's bundled in an **aqua blue** bed and bunting.)
