

Puzz 3D™

CHÂTEAU DE CHENONCEAU

Important Building Information

Remember to refer to the different views of the completed puzzle on the back of your box when working on those parts of your puzzle.

Front

Right

IMPORTANT NOTICE

All pieces with red dots are *not* part of your Puzz-3D. Set these pieces aside while you build your puzzle. Then discard them only when your puzzle is complete. Careful! Some unmarked pieces may remain interlocked with red-dot pieces. Also, some waste pieces are too small to be marked with red dots. Therefore, check these pieces thoroughly before discarding.

Helpful Hints

- Increased handling of your Puzz-3D does create some static cling. Keep an eye on your surroundings and your sleeves while you are working.
- If you have pets, keep them away from the puzzle. They love to play with the foam pieces, although the foam is non-toxic.

Missing Puzzle Pieces

If a piece of your Puzz-3D is missing or damaged, we will replace it. Simply indicate on this puzzle guide sheet approximately where the problem is occurring. Then send this guide sheet with the area circled, along with your name, address and phone number to the address below.

If your puzzle's missing piece is not clearly shown in any of the drawings, in addition to circling the area, briefly describe which piece you need.

Remember to check thoroughly through your bag of discarded pieces to determine if any puzzle pieces are still attached to red-dot pieces.

Consumer Service
Milton Bradley Company
443 Shaker Road
East Longmeadow, MA 01028

Within 2 to 4 weeks you will receive the
required piece(s).

ASSEMBLY INSTRUCTIONS FOR YOUR PUZZ-3D ADVENTURE!

1 Remove and set aside waste pieces

Pieces with red dots on them are not to be used in your puzzle. Remove them from your bag of puzzle pieces and set them aside. Some are very tiny — about 1/4 inch square — and you will need to remove them from the inside of puzzle pieces. **DO NOT THROW AWAY ANY RED-DOT PIECES!** Frequently, puzzle pieces are still attached to red-dot pieces and it's easy to miss them. For now, remove all the red-dot pieces and place them in a safe place, such as a zip-top plastic bag.

Various types of red-dot pieces

2 Examine the types of puzzle pieces

Jigsaw: These pieces have regular jigsaw cuts and are used in the middle of a wall or base. They are never used to create an edge or corner.

Square: These pieces have square cuts on one or more sides. They "dovetail" with pieces having the same type of edge to form an angle when they connect. These pieces create your puzzle's corners and are what make your Puzzle-3D three-dimensional! A corner can be formed by connecting a base to a wall, a roof to a wall or a wall to another wall. See illustration.

Straight edge Curved edge

Edge: These pieces have one or two straight or curved edges. The outside edge of the base of your puzzle is made up of these, but they can also create an edge of another section, such as the top of a wall.

Decorative: The remainder of your pieces are decorative and are usually added at the end to complete your puzzle. An example would be the top of a tower.

3 Assemble the sections

Sort pieces according to color and design, then assemble them to form flat sections of your puzzle. Since your Puzzle-3D is made from foam, it's much easier to mistakenly fit the wrong pieces together than it is with cardboard! When connecting pieces, be sure the artwork on the two pieces matches perfectly. Look for subtle color, shade and design differences between pieces. In most cases, a finished section will have its perimeter entirely made up of square cut pieces, as shown here. Some sections, however, may have one or more sides that are straight or curved.

A completed section with square cut pieces in gray

4 Think vertical!

Remember, your puzzle is not just a picture, but a dimensional model! The inside will be hollow. The vertical walls attach to the horizontal base wherever each side consists of square cut edges. The base will be flat and the walls will go UP!

A sample of a base and wall

Use the photographs on the front and back of the box to locate the sections that are needed to complete each of the following steps.

Château de Chenonceau

THE TWO BASIC UNITS

Refer to the figures below for steps 5 through 11.

5 Build the base

Locate the pieces that make up the five base sections of your puzzle. The base only goes *around* the puzzle; it does not go completely under it.

6 Build the 10 inner support walls

Locate the sections that make up the 10 inner support walls and attach them to the base sections as shown.

7 Build the left side corridor wall

Attach the left side corridor wall to the inner support walls and base as shown.

8 Build the right side corridor wall

Attach the right side corridor wall to the inner support walls and base as shown.

9 Build the corridor end wall

Attach the corridor end wall sections to the left and right side corridor walls and base as shown.

10 Attach the 10 pillars

Attach the pillar sections (three sections per pillar) to the left and right side corridor walls and base as shown.

11 Attach the corridor windows

Press the 8 corridor windows into their openings in the left and right side corridor walls as shown. Note: Allow each window to protrude slightly. This will create a greater dimensional effect.

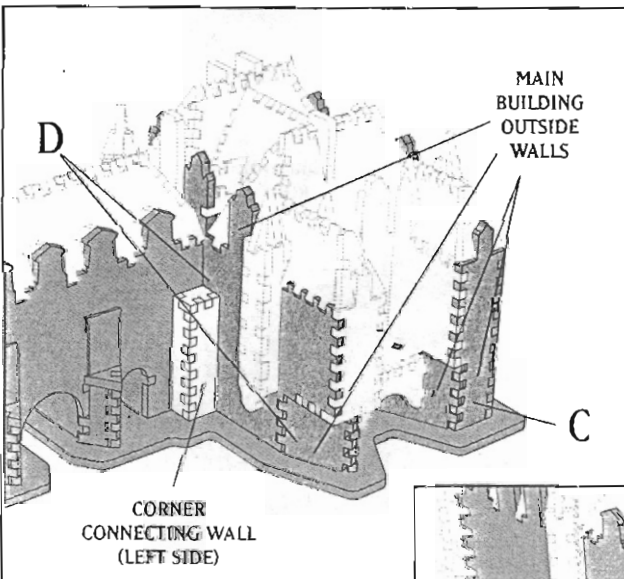

Refer to the figures below for steps 12 through 15.

12 Build the main building's outside walls

Beginning with the right side wall (A) and moving clockwise, attach the outside walls (A, B, C, D) of the main building to the base as shown.

13 Build the two corner connecting walls

Attach the left and right side corner connecting walls to the main building and corridor walls as shown.

14 Build the tunnel

Attach the tunnel to the main building as shown.

15 Build the second story outside walls

Locate the sections that make up the second story outside walls, and its hidden section (the underside). Attach the hidden section to the main building first; then attach the outside walls as shown.

Refer to the figures below for steps 16 through 21.

16 Build the four turrets

Attach the turrets to the outside walls of the main building as shown.

17 Build the stone landing

Locate the sections that make up the stone landing and attach them to the main building as shown.

18 Corridor roof

Locate the four sections that make up the corridor roof and attach them to the corridor walls as shown.

19 Main building roof

Referring to the photograph on the box bottom, assemble together the sections that make up the roof of the main building. Then attach the assembled roof to the outside walls of the main building as shown.

20 Mini roof peaks

Attach the two mini roof peaks to the main building roof as shown.

21 Chimneys and turret tops

Attach the chimneys and turret tops as shown.
