IMPORTANT NOTICE

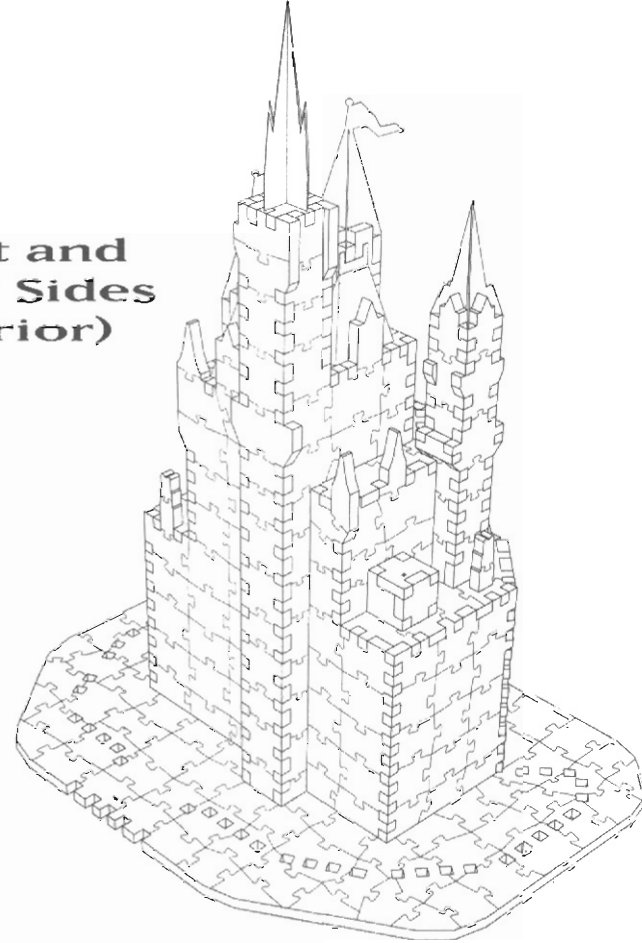

All pieces with red dots are *not* part of your Puzz-3D. Set these pieces aside while you build your puzzle. Then discard them only when your puzzle is complete. Careful! Some unmarked pieces may remain interlocked with red-dot pieces. Also, some waste pieces are too small to be marked with red dots. Therefore, check these pieces thoroughly before discarding.

Important Building Information

Vertical portions of your puzzle (such as walls) fit onto the horizontal portions (floors, rooftops, etc.) as shown in the illustration below. You may find it easier to build the base of your puzzle first, then attach the puzzle wall pieces to the base.

Remember to refer to the different views of the completed puzzle on the back of your box when working on those parts of your puzzle.

Helpful Hints

- Increased handling of your Puzz-3D does create some static cling. Keep an eye on your surroundings and your sleeves while you are working.
- If you have pets, keep them away from the puzzle. They love to play with the foam pieces, although the foam is non-toxic.

Missing Puzzle Pieces

If a piece of your Puzz-3D is missing or damaged, we will replace it. Simply indicate on this puzzle guide sheet approximately where the problem is occurring. Then send this guide sheet with the area circled, along with your name, address and phone number to the address below.

- If your puzzle's missing piece is not clearly shown in any of the drawings, in addition to circling the area, briefly describe which piece you need.

Remember to check thoroughly through your bag of discarded pieces to determine if any puzzle pieces are still attached to red-dot pieces.

Puzz-3D
 Milton Bradley Company
 443 Shaker Road

ASSEMBLY INSTRUCTIONS FOR YOUR PUZZ-3D ADVENTURE!

1 Remove and set aside waste pieces

Pieces with red dots on them are not to be used in your puzzle. Remove them from your bag of puzzle pieces and set them aside. Some are very tiny — about 1/4 inch square — and you will need to remove them from the inside of puzzle pieces. **DO NOT THROW AWAY ANY RED-DOT PIECES!**

Frequently, puzzle pieces are still attached to red-dot pieces and it's easy to miss them. For now, remove all the red-dot pieces and place them in a safe place, such as a zip-top plastic bag.

Various types of red-dot pieces

2 Examine the types of puzzle pieces

Jigsaw: These pieces have regular jigsaw cuts and are used in the middle of a wall or base. They are never used to create an edge or corner.

Square: These pieces have square cuts on one or more sides. They "dovetail" with pieces having the same type of edge to form an angle when they connect. These pieces create your puzzle's corners and are what make your Puzz-3D three-dimensional! A corner can be formed by connecting a base to a wall, a roof to a wall or a wall to another wall. See illustration.

Straight edge Curved edge

Edge: These pieces have one or two straight or curved edges. The outside edge of the base of your puzzle is made up of these, but they can also create an edge of another section, such as the top of a wall.

Decorative: The remainder of your pieces are decorative and are usually added at the end to complete your puzzle. An example would be the top of a tower.

3 Assemble the sections

Sort pieces according to color and design, then assemble them to form flat sections of your puzzle. Since your Puzz-3D is made from foam, it's much easier to mistakenly fit the wrong pieces together than it is with cardboard! When connecting pieces, be sure the artwork on the two pieces matches *perfectly*. Look for subtle color, shade and design differences between pieces. In most cases, a finished section will have its perimeter entirely made up of square cut pieces, as shown here. Some sections, however, may have one or more sides that are straight or curved.

A completed section with square cut pieces in gray

4 Think vertical!

Remember, your puzzle is not just a *picture*, but a dimensional model! **The inside will be hollow.** The vertical walls attach to the horizontal base wherever each side consists of square cut edges. The base will be flat and the walls will go UP!

A sample of a base and wall

Cinderella's Castle

Use the photographs on the front and back of the box to locate the sections that are needed to complete each of the following steps.

Refer to the figures below for steps 5 through 7.

5 Build the base

Locate the pieces that make up the base of your puzzle. The base only goes around the puzzle; it does not go completely under it.

6 Build the main building's 7 walls

Locate the sections that make up the walls of the main building and attach them to the base.

7 Build the second floor

Locate the section that makes up the second floor and attach it to the main building's walls.

Refer to the figures below for steps 8 through 12.

8 Build the second story's 11 walls

Locate the sections that make up the walls of the second story and attach them to the second floor.

9 Build the second story's box

Locate the sections that make up the second story's box and attach them to the second floor.

10 Chimney pipes

Attach the chimney pipes to the second floor.

11 Build the second story's tower

Assemble and attach the second story's tower to the second floor.

12 Build the third floor

Locate the section that makes up the third floor and attach it to the second story's walls.

Refer to the figures below for step 13.

13 Build the tall tower

Assemble and attach the tall tower to the main building's walls and third floor. Reach up through the base to secure the tall tower into place.

Refer to the figure below for steps 14 and 15.

14 Build the third story's 3 remaining walls

Locate the sections that make up the remaining walls of the third story and attach them to the third floor and the third story's existing walls.

15 Build the third story's tower

Assemble and attach the third story's tower to the third floor. Reach up through the base to secure the tower into place.

The Architect of Puzz-3D

First produced in 1991, this ingenious foam puzzle was the brainchild of Paul Gallant, the founder of Wrebbit, Inc., a Canadian toy and game manufacturer. Today, Mr. Gallant and his talented staff offer a variety of Puzz-3D designs, everything from famous landmarks to imaginary places.

Designed by:

Wrebbit_{INC./TM}

Refer to the figures below for steps 16 through 18.

16 Build the front entry's bridge

Assemble and attach the front entry's bridge to the base.

17 Build the 11 outside walls

Locate the sections that make up the outside walls and attach them to the base and main building's walls.

18 Build the entrance arch

Locate the four sections that make up the entrance arch. Attach the side sections to the base and outside walls first. Then attach the front and back sections to the side sections.

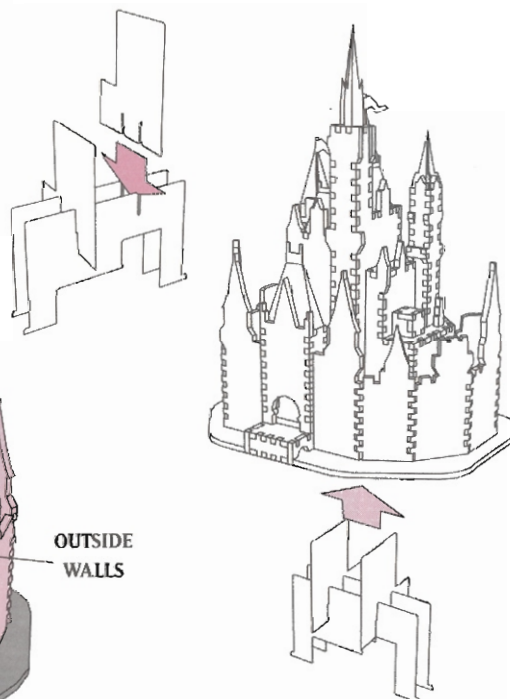

19 Build the spires

Assemble the spires and attach them to the tower tops and mini roofs.

20 Center support

Assemble the center support and insert as shown.
