

NOTRE DAME
CATHEDRAL

IMPORTANT NOTICE

All pieces with red dots are *not* part of your Puzz-3D. Set these pieces aside while you build your puzzle. Then discard them only when your puzzle is complete. Careful! Some unmarked pieces may remain interlocked with red-dot pieces. Also, some waste pieces are too small to be marked with red dots. Therefore, check these pieces thoroughly before discarding.

Helpful Hints

- Increased handling of your Puzz-3D does create some static cling. Keep an eye on your surroundings and your sleeves while you are working.
- If you have pets, keep them away from the puzzle. They love to play with the foam pieces, although the foam is non-toxic.

Missing Puzzle Pieces

If a piece of your Puzz-3D is missing or damaged, we will replace it. Simply indicate on this puzzle guide sheet approximately where the problem is occurring. Then send this guide sheet with the area circled, along with your name, address and phone number to the address below.

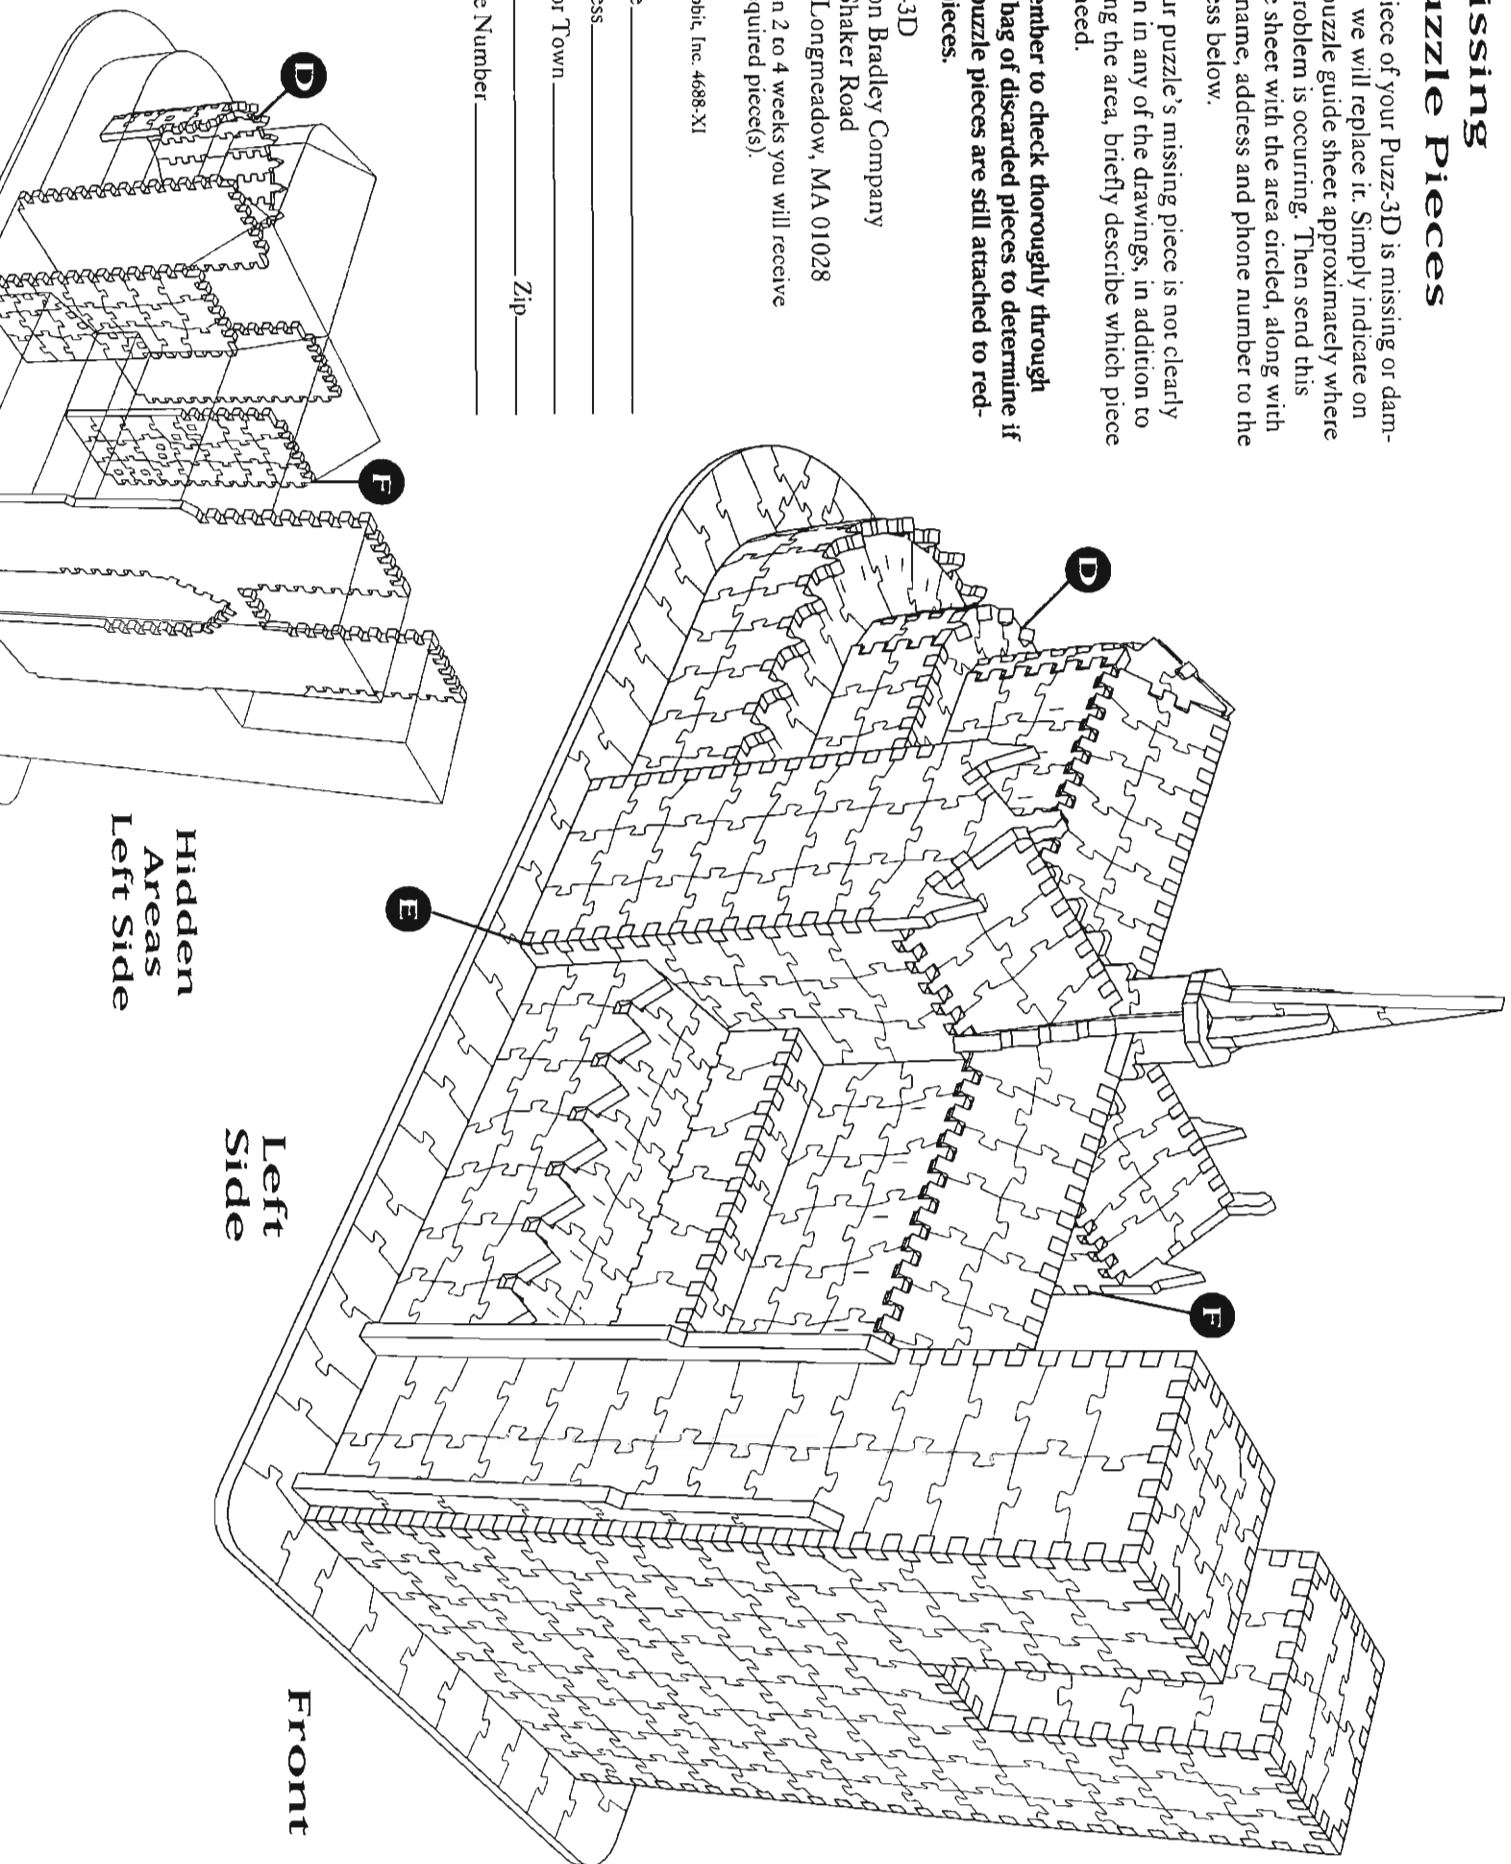

If your puzzle's missing piece is not clearly shown in any of the drawings, in addition to circling the area, briefly describe which piece you need.

Remember to check thoroughly through your bag of discarded pieces to determine if any puzzle pieces are still attached to red-dot pieces.

Puzz-3D
Milton Bradley Company
443 Shaker Road
East Longmeadow, MA 01028
Within 2 to 4 weeks you will receive the required piece(s).

ASSEMBLY INSTRUCTIONS FOR YOUR PUZZ-3D ADVENTURE!

1 Remove and set aside waste pieces

Pieces with red dots on them are not to be used in your puzzle. Remove them from your bag of puzzle pieces and set them aside. Some are very tiny — about 1/4 inch square — and you will need to remove them from the inside of puzzle pieces. **DO NOT THROW AWAY ANY RED-DOT PIECES!**

Frequently, puzzle pieces are still attached to red-dot pieces and it's easy to miss them. For now, remove all the red-dot pieces and place them in a safe place, such as a zip-top plastic bag.

Various types of red-dot pieces

2 Examine the types of puzzle pieces

Jigsaw: These pieces have regular jigsaw cuts and are used in the middle of a wall or base. They are never used to create an edge or corner.

Square: These pieces have square cuts on one or more sides. They "dovetail" with pieces having the same type of edge to form an angle when they connect. These pieces create your puzzle's corners and are what make your Puzz-3D three-dimensional! A corner can be formed by connecting a base to a wall, a roof to a wall or a wall to another wall. See illustration.

Decorative: The remainder of your pieces are decorative and are usually added at the end to complete your puzzle. An example would be the top of a tower.

Straight edge

Curved edge

Edge: These pieces have one or two straight or curved edges. The outside edge of the base of your puzzle is made up of these, but they can also create an edge of another section, such as the top of a wall.

3 Assemble the sections

Sort pieces according to color and design, then assemble them to form flat sections of your puzzle. Since your Puzz-3D is made from foam, it's much easier to mistakenly fit the wrong pieces together than it is with cardboard! When connecting pieces, be sure the artwork on the two pieces matches perfectly. Look for subtle color, shade and design differences between pieces. In most cases, a finished section will have its perimeter entirely made up of square cut pieces, as shown here. Some sections, however, may have one or more sides that are straight or curved.

A completed

section with square cut pieces in gray

4 Think vertical!

Remember, your puzzle is not just a picture of a landmark, but a dimensional model of it! **The inside will be hollow.** The vertical walls attach to the horizontal base wherever each side consists of square cut edges. The base will be flat and the walls will go UP!

A sample of a base and wall

Notre Dame

Refer to the figure below for steps 5 and 6.

5 Build the base

Locate the edge pieces that make up the base of your puzzle.
The base only goes *around* the puzzle, it does not go completely under it.

3-tiered back section and do the following in order:

- Gently curve and attach the ground floor wall to the base as shown.

6 Build the 3-tiered back section

Using the photographs on the front and back of the box, locate the sections that make up the curved roofs and walls of the

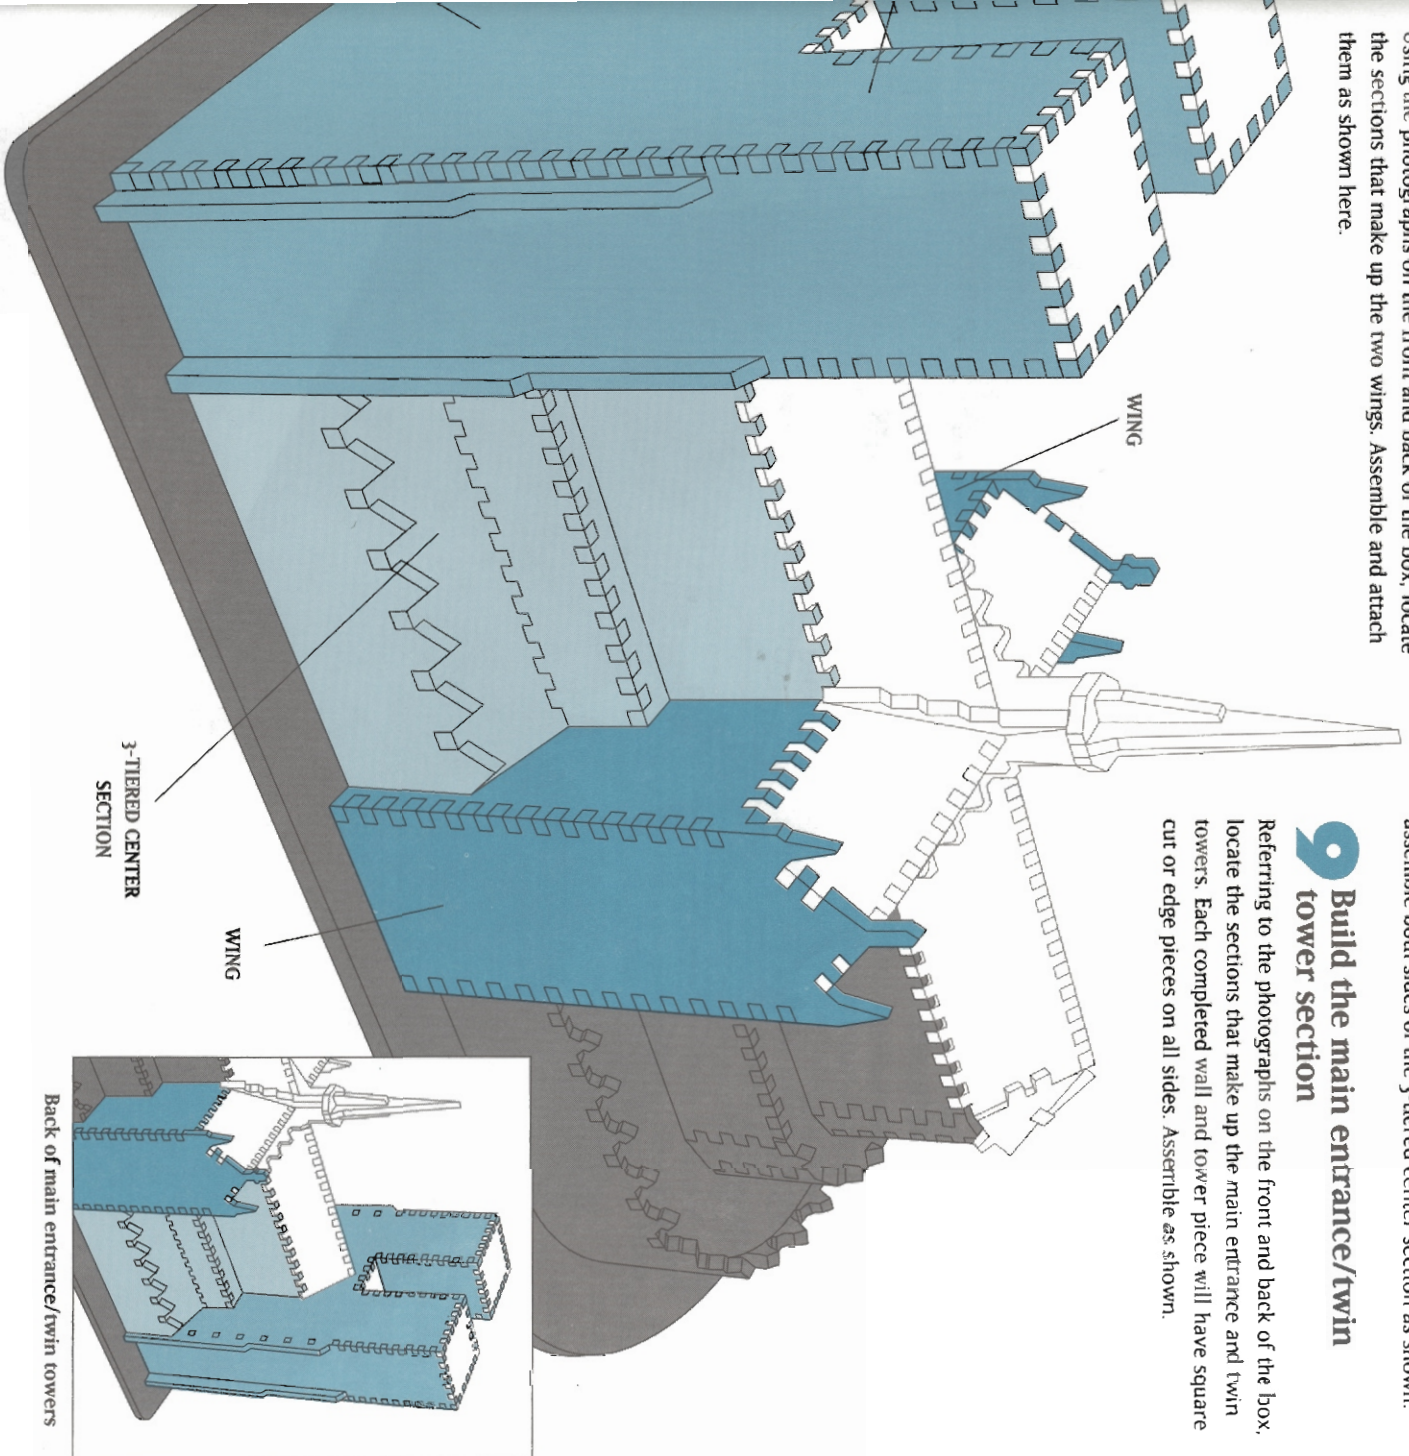

- Assemble the two upper tiers by attaching the walls to the curved roof sections as shown.
- Attach the assembled upper tiers to the ground floor wall as shown.

Refer to the figure below for steps 7, 8 and 9.

7 Build the wings

Using the photographs on the front and back of the box, locate the sections that make up the two wings. Assemble and attach them as shown here.

8 Build the 3-tiered center section

Using the photographs on the front and back of the box, locate the sections that make up the 3-tiered center section. Now assemble both sides of the 3-tiered center section as shown.

9 Build the main entrance/twin tower section

Referring to the photographs on the front and back of the box, locate the sections that make up the main entrance and twin towers. Each completed wall and tower piece will have square cut or edge pieces on all sides. Assemble as shown.

Back of main entrance/twin towers

The Architect of Puzz-3D

First produced in 1991, this ingenious foam puzzle was the brainchild of Paul Gallant, the founder of Wrebbit, Inc., a Canadian toy and game manufacturer. Today, Mr. Gallant and his talented staff offer a variety of Puzz-3D designs, everything from famous landmarks to imaginary places.

Refer to the figure below for steps 10, 11 and 13.

10 Flat roofs

Locate the sections that make up the flat roofs. Attach them as shown.

by inserting top and bottom tabs into pre-cut puzzle piece slots. There are no slots for the top tabs in the curved top tier back wall section. Just insert the tabs between sections.

13 Spire

Assemble and attach the spire as shown.

11 Pitched roofs

Referring to the photographs on the front and back of the box, locate the sections that make up the pitched roofs. Join each roof section to form a peak, then attach the assembled pieces to the walls and other roofs.

Now, attach the 3 triangular roof pieces to the curved area of the 3-tiered back section.

12 Attach the buttresses

Punch out the cardboard buttresses from the parts sheet. Using the photographs on the front and back of the box to find the proper location for each buttress, attach them to the walls and roofs
