

# Charles Wysocki's Americana<sup>®</sup> SEASIDE LIGHTHOUSE

## IMPORTANT NOTICE

All pieces with red dots are *not* part of your Puzz-3D. Set these pieces aside while you build your puzzle. Then discard them only when your puzzle is complete. Careful! Some unmarked pieces may remain interlocked with red-dot pieces. Also, some waste pieces are too small to be marked with red dots. Therefore, check these pieces thoroughly before discarding.

## Important Building Information

Vertical portions of your puzzle (such as walls) fit onto the horizontal portions (floors, rooftops, etc.) as shown in the illustrations below. You may find it easier to build the base of your puzzle first, then attach the puzzle wall pieces to the base.

Remember to refer to the different views of the completed puzzle on the back of your box when working on those parts of your puzzle.

### BATTERY BOX AND LIGHT ASSEMBLY DETAIL

F

- Increased handling of your Puzz-3D does create some static cling. Keep an eye on your surroundings and your sleeves while you are working.
- If you have pets, keep them away from the puzzle. They love to play with the foam pieces. The foam is non-toxic.

## Missing Puzzle Pieces

If a piece of your Puzz-3D is missing or damaged, we will replace it. Simply indicate on this puzzle guide sheet approximately where the problem is occurring. Then send this guide sheet with the area circled, along with your name, address and phone number to the address below.

If your puzzle's missing piece is not clearly shown in any of the drawings, in addition to circling the area, briefly describe which piece you need.

Remember to check thoroughly through your bag of discarded pieces to determine if any puzzle pieces are still attached to red-dot pieces.

Hasbro Games  
Consumer Affairs Dept.  
P.O. Box 200  
Pawtucket, RI 02862  
Tel: 888-836-7025 (toll-free).

Within 2 to 4 weeks you will receive the required piece(s).

# ASSEMBLY INSTRUCTIONS FOR YOUR PUZZ-3D ADVENTURE!

## 1 Remove and set aside waste pieces

Pieces with red dots on them are not to be used in your puzzle. Remove them from your bag of puzzle pieces and set them aside. Some are very tiny — about 1/4 inch square — and you will need to remove them from the inside of puzzle pieces. **DO NOT THROW AWAY ANY RED-DOT PIECES!** Frequently, puzzle pieces are still attached to red-dot pieces and it's easy to miss them. For now, remove all the red-dot pieces and place them in a safe place, such as a zip-top plastic bag.

Various types of red-dot pieces

## 2 Examine the types of puzzle pieces

**Jigsaw:** These pieces have regular jigsaw cuts and are used in the middle of a wall or base. They are never used to create an edge or corner.

**Square:** These pieces have square cuts on one or more sides. They "dovetail" with pieces having the same type of edge to form an angle when they connect. These pieces create your puzzle's corners and are what make your PUZZ-3D three-dimensional! A corner can be formed by connecting a base to a wall, a roof to a wall or a wall to another wall. See illustration.

Straight edge    Curved edge

**Edge:** These pieces have one or two straight or curved edges. The outside edge of the base of your puzzle is made up of these, but they can also create an edge of another section, such as the top of a wall.

**Decorative:** The remainder of your pieces are decorative and are usually added at the end to complete your puzzle. An example would be the top of a tower.

## 3 Assemble the sections

Sort pieces according to color and design, then assemble them to form flat sections of your puzzle. Since your PUZZ-3D is made from foam, it's much easier to mistakenly fit the wrong pieces together than it is with cardboard! When connecting pieces, be sure the artwork on the two pieces matches *perfectly*. Look for subtle color, shade and design differences between pieces. In most cases, a finished section will have its perimeter entirely made up of square cut pieces, as shown here. Some sections, however, may have one or more sides that are straight or curved.

A completed section with square cut pieces in gray

## 4 Think vertical!

Remember, your puzzle is not just a *picture*, but a dimensional model! **The inside will be hollow.** The vertical walls attach to the horizontal base wherever each side consists of square cut edges. The base will be flat and the walls will go UP!

## 5 Build the base

Locate the pieces that make up the base and build it on a movable board. This will allow you to move your puzzle when it is complete. The base only goes *around* the puzzle; it does not go completely under it.

Refer to the illustration at right for steps 6 through 9.

## 6 Make the tower support and walls

Build the tower support around the cord with the bulb above the picture side. Build the tower walls, matching the artwork very carefully, and wrap them around the support, running the cord through the top and bottom of the tower.

## 7 Add the tower top and washers

Build the flat top of the tower around the cord with the bulb above its picture side. Fasten the two washers by slipping the cord through the slit in each.

## 8 Attach the cardboard bulb stabilizer

Fold the cardboard bulb stabilizer as shown, slipping the tab into the slot. Slide this down onto the base of the flat tower top around the bulb.

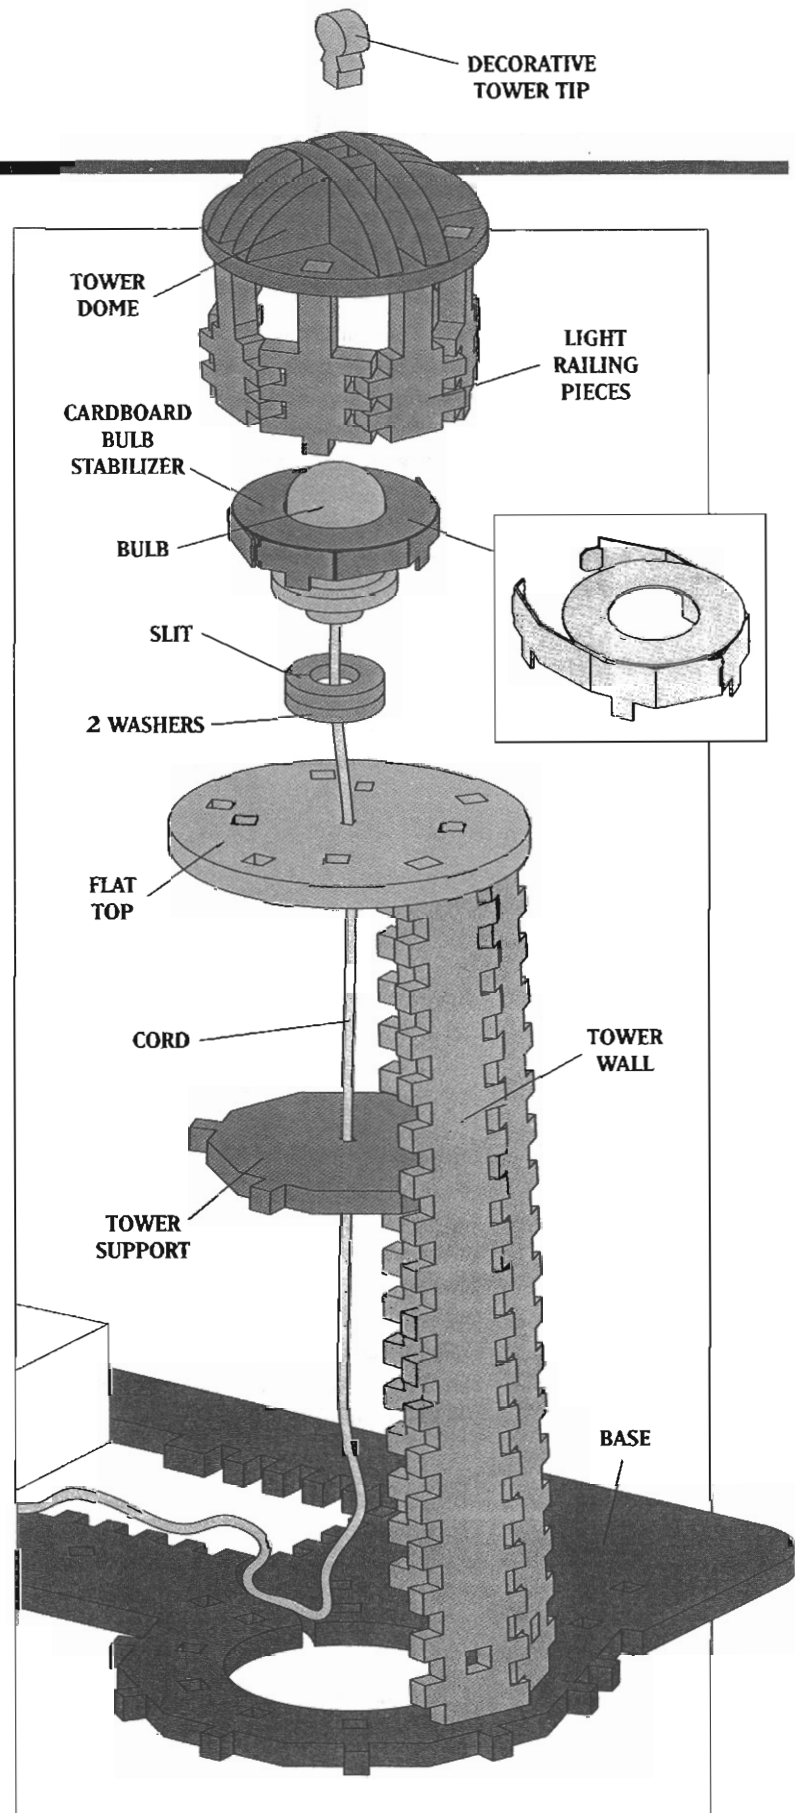

### Tightening and Replacing the Bulb

If the bulb does not light up, it may need tightening. Carefully remove the clear plastic cap and tighten the bulb by carefully turning it to the right.

To replace a burned-out or broken bulb, use only a 2.5-volt (flashlight) screw bulb. Carefully remove the clear plastic cap and the old bulb. Then screw in the new bulb and replace the cap.

## 9 Finish the tower

Build and add the light railing pieces, tower dome and decorative tower tip. Fit the finished tower to the base.

Use the photographs on the front and back of the box to locate the sections that are needed to complete each of the following steps.

## 10 Install the batteries

Remove the battery box cover with a screwdriver and install 2 "C" size batteries as shown. Replace the cover and screw it back into place.

### CAUTION: To Avoid Battery Leakage

- Be sure to insert the batteries correctly and always follow the game and battery manufacturers' instructions.
- Do not mix old and new batteries, or alkaline, standard (carbon-zinc) or rechargeable (nickel cadmium) batteries.
- Always remove weak or dead batteries from the product.

## 11 Add the battery box holder

Fold the cardboard battery box holder as shown. Place the battery box in the holder in the center of the puzzle, slipping the cord through the slot in the holder. Make sure the switch is in the back of the puzzle.

## 12 Begin the main building

Construct the walls and roof of the main building and attached wing. Join the front walls and front roof section around the battery box as shown. Fit the tabs on the battery box holder into the slots on the front wall. Attach the rest of the walls and roof of the wing.

## The Architect of Puzz-3D

First produced in 1991, this ingenious foam puzzle was the brainchild of Paul Gallant, the founder of Wrebbit, Inc., a Canadian toy and game manufacturer. Today, Mr. Gallant and his talented staff offer a variety of Puzz-3D designs, everything from famous landmarks to imaginary places.

Designed by:

**Wrebbit**<sup>INC.™</sup>

### 13 Finish the main building

Fasten the final back wall. This wall has a window that opens so you can reach in and turn on your lighthouse bulb. Fit the tabs on the battery box holder into the slots on the wall. Build the light house chimney and slide it into the notch in the front of the roof. Attach the back of the roof to finish the main building.

### 14 Construct the storage shed

Make the walls and roof of the storage shed. Making sure the cord runs through the long slot in the base, attach the walls of the shed to the base. Finish the shed by attaching the roof.

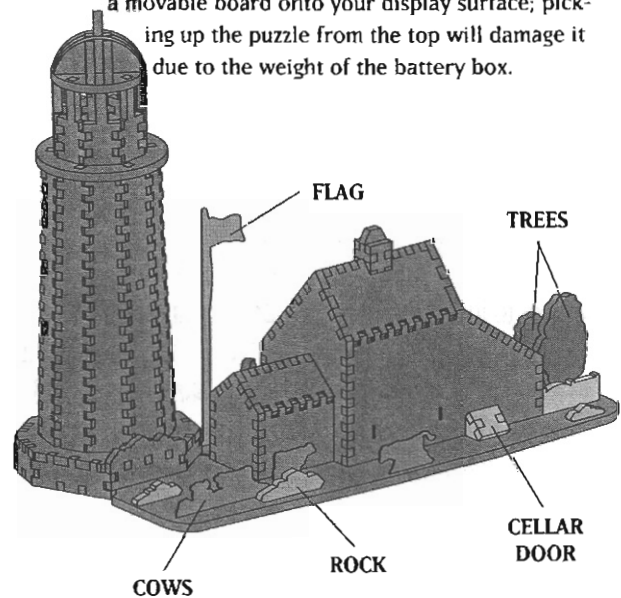

### 15 Add the breakwater

Build and attach the breakwater wall at the bottom of the tower. Construct the top of this wall and join it to the tower.

### 16 Fasten the accessories

Build and add all the additional accessories: trees, gate, storm cellar door, and rocks. Carefully attach the cardboard accessories, using a nail file to open up the slots in the base as necessary. Your completed puzzle must be slid off a movable board onto your display surface; picking up the puzzle from the top will damage it due to the weight of the battery box.
