

Shampoodle™

Ages: 3 & Up

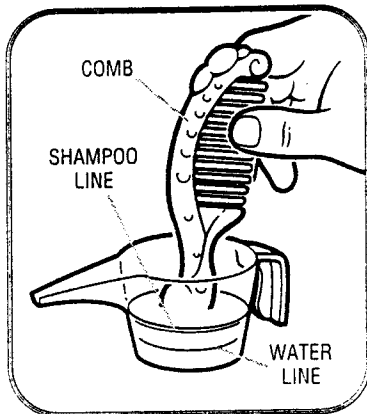

9004

Instructions

Shampoodle is lots of foamy bathtime fun! Baby shampoo may be used with this product. For best results, we recommend using a mild, clear shampoo.

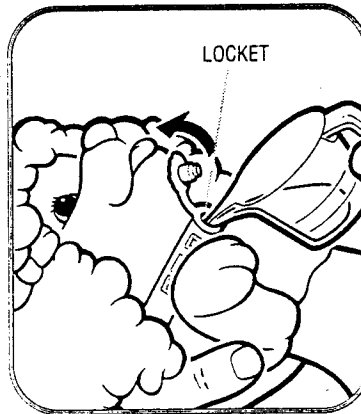

(Note: Always follow the instructions and cautions on the shampoo manufacturer's label.)

Filling the Cup:

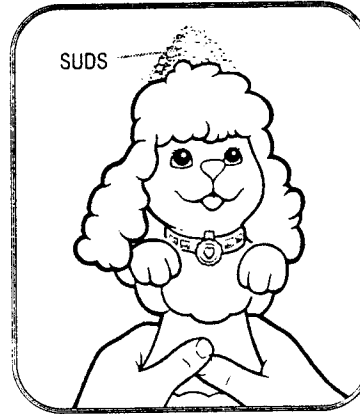

1. Fill the cup with water to the indicated fill line. Then pour in shampoo to the second line. Stir with end of the enclosed comb until solution is completely mixed.

Making Suds:

2. Pull open Shampoodle's locket and **slowly** pour in the shampoo and water solution as shown. Close the locket.

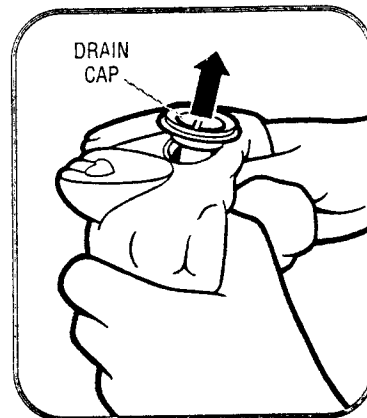

3. Shampoodle is now ready to play! Firmly squeeze her tummy 3-4 times, and the suds will begin to appear on top of her head. Continue squeezing until her hair is as sudsy as desired. Now use the suds to shape and style Shampoodle's silky hair into lots of fun shampoo styles.

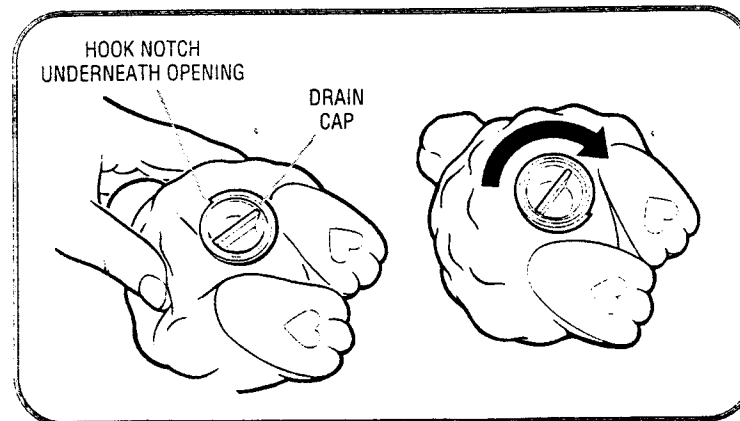

To Parent: (Steps 4-7)

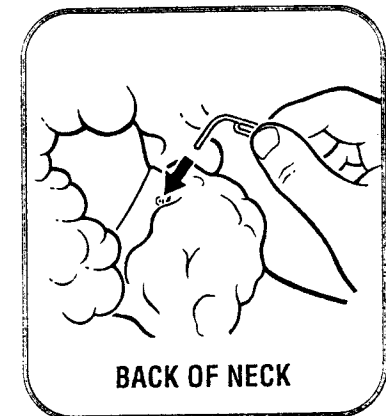

4. **After play:** When your child is finished playing, open Shampoodle's locket and run warm water through the opening while holding Shampoodle at an angle and squeezing tummy as shown. Continue running water until the shampoo suds are completely rinsed out. Then thoroughly rinse Shampoodle's hair to avoid shampoo buildup or hair staining. To maintain curl, scrunch hair with hands for several seconds before allowing hair to air dry.

5. **To drain excess water from body:** Turn Shampoodle upside down. Hold bottom with both hands and squeeze until the drain cap pops out. Drain excess water.

6. **To re-fasten drain cap:**
1. Line up drain cap with tube inside Shampoodle.
2. Hold Shampoodle and squeeze bottom to hook the notch on drain cap underneath the lip on the opening.
3. Fasten cap by twisting in a clockwise direction.
4. If you experience difficulty, you may use one or two drops of shampoo to lubricate the rim of the drain cap.

7. If Shampoodle's body does not assume its proper shape after squeezing, the air hole in back of her neck is probably clogged: insert a paper clip as shown and rinse with warm water.
