

# THINGS™

## GO-RILLA™

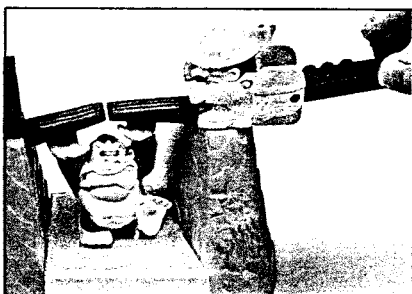

**OBJECT:** Roll all 8 barrels safely into the cabin before the timer stops.

**CONTENTS:**  
1 plastic bridge base  
1 plastic Explorer  
8 plastic barrels  
1 label sheet

### Can You Roll the Barrels to Safety Before Time Runs Out?

1. Apply labels where shown. Slide the Explorer onto the bridge base.

2. Load the barrels one at a time, by rolling them down into the backpack.

3. Move the timer arm counterclockwise as far as it will go. Go-Rilla will begin rocking the bridge!

4. Push the Explorer's button. A barrel will roll out of his backpack and onto the rocking, rattling bridge.

5. Keep pushing the button to roll out the barrels. Will they roll safely into the cabin—or get knocked off the bridge?

6. When the timer stops, Go-Rilla pops the bridge open! How many barrels made it into the cabin?

**UNLOADING THE BARRELS:** When you finish a game, just lift the trap door below the cabin to release the barrels inside.
