

TECHNO ZOID™

ELECTRONIC BATTLES SAURUS™

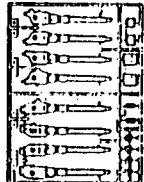

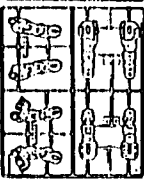

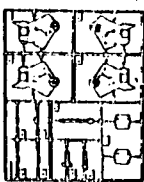

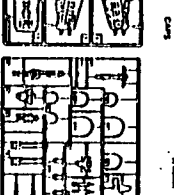

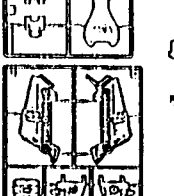

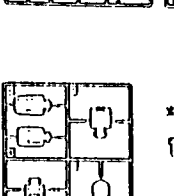

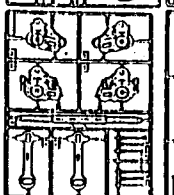

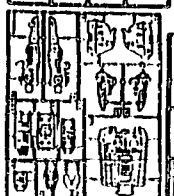

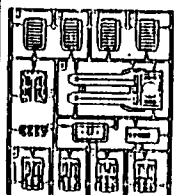

IMPORTANT:

1. Use the rubber feet to hold the model steady on a flat surface. Do not use your fingers to hold the model. The feet will ensure the stability of the body and will prevent the model from tipping over. The feet will also help to keep the model steady during the assembly process.

2. Use the rubber feet to hold the model steady on a flat surface. Do not use your fingers to hold the model. The feet will ensure the stability of the body and will prevent the model from tipping over. The feet will also help to keep the model steady during the assembly process.

3. Use the rubber feet to hold the model steady on a flat surface. Do not use your fingers to hold the model. The feet will ensure the stability of the body and will prevent the model from tipping over. The feet will also help to keep the model steady during the assembly process.
