

PLAYSKOOL

Tinkertoy®

Space Explorer Set

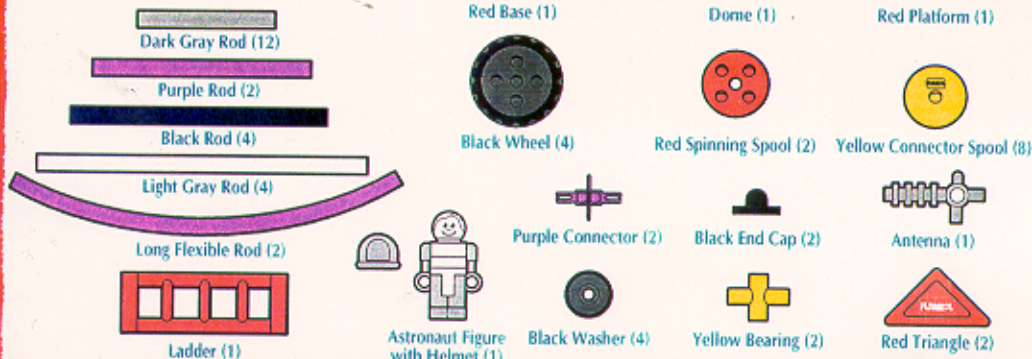

NOTE TO PARENTS: As a helpful tip, you may want to show your child that assembly is made easier by simply twisting Tinkertoy pieces as you put them together or take them apart.

As with all preschool activities, there is a learning curve involved in building with Tinkertoy pieces. Some of the projects are designed for more advanced levels of skill. Your child should begin with the Starter Projects and work his/her way up to the more difficult designs.

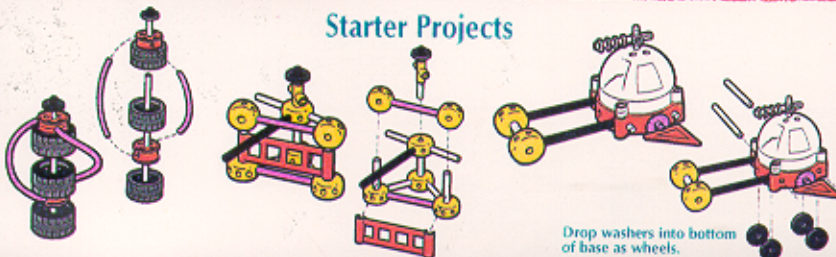

INSTRUCTIONS

With this complete, easy-to-assemble system, you can build with these pieces or combine pieces from different sets to create all kinds of colorful designs! Below are some examples to help you get started. Happy tinkering!

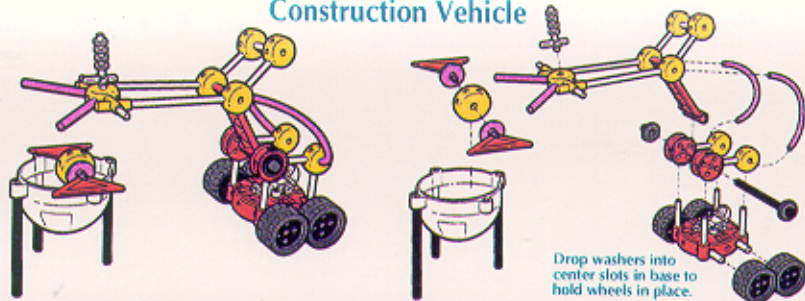

To identify the pieces you'll be using, refer to this key.

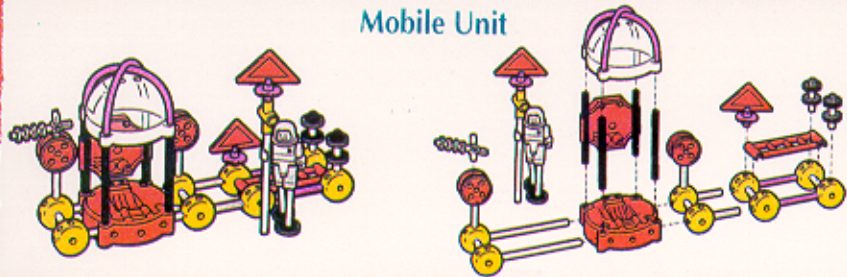

Starter Projects

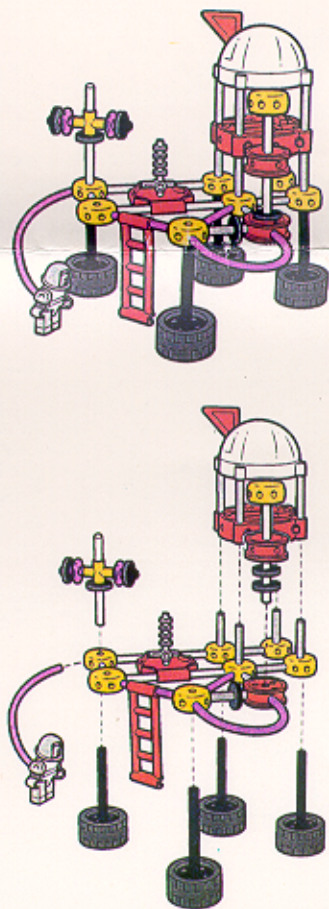

Construction Vehicle

Mobile Unit
