BASE

HOLES

TO BEGIN:

Place balls in bucket. Press down on tee, and Toddler Golf will automatically tee a ball! Now you're ready to play!

1. Drop 'n Take Play:

Children remove the ball from the tee and watch another ball magically roll out of the bucket and onto the tee! Great for young toddlers who haven't quite developed the coordination to hit the ball. (Note: Slightly press ball down when removing it from tee to activate automatic-tee feature.)

2. First Swings:

Children take their first swings at the ball with the chunky golf club! Great for toddlers who are standing more confidently and have improved their coordination skills. Automatic tee lets kids take 4 swings before picking up balls.

3. Putting Practice:

Children can remove the cover to use it as a "hole" for putting practice! A progressive challenge for older kids!
