

Tonka Bubble FIRE TRUCK

INSTRUCTIONS

KOOSH
BRAND
Bubbles™

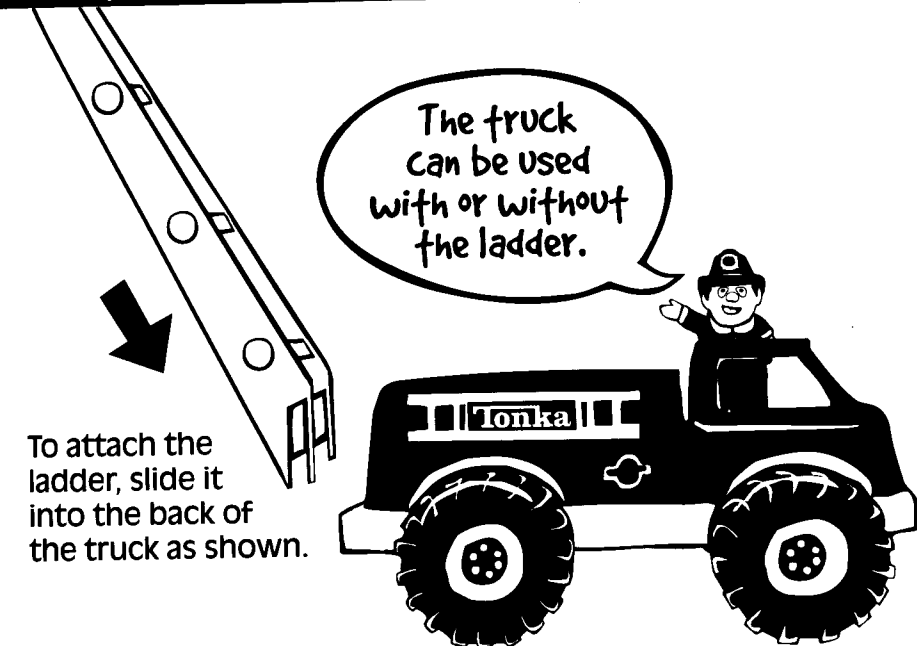

CHIEF
BUBBLES™

Thank you for purchasing the Tonka®
Bubble Fire Truck by Koosh Bubbles™.

Please use the Tonka Bubble Fire
Truck only under adult supervision.

Filling and emptying of the truck
should only be performed by an adult.

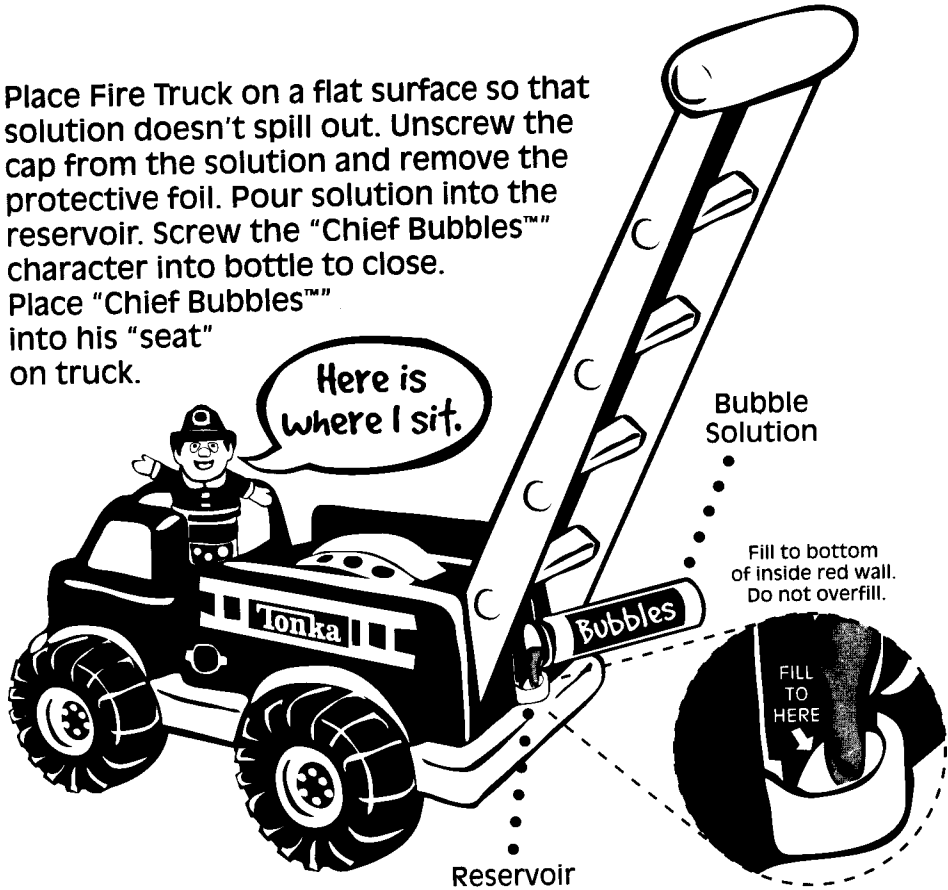

Do not put anything but bubble
solution (or water) into the truck. Other
substances may affect the truck's ability
to produce bubbles.

The truck
can be used
with or without
the ladder.

To attach the
ladder, slide it
into the back of
the truck as shown.

Place Fire Truck on a flat surface so that
solution doesn't spill out. Unscrew the
cap from the solution and remove the
protective foil. Pour solution into the
reservoir. Screw the "Chief Bubbles™"
character into bottle to close.
Place "Chief Bubbles™"
into his "seat"
on truck.

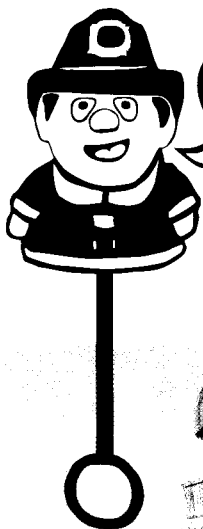

Here is
where I sit.

Bubble
Solution

Fill to bottom
of inside red wall.
Do not overfill.

FILL
TO
HERE

Reservoir

I'm a fun bubblewand too!

For best results, push truck on hard surface. Bubbles will come out of truck when pushed.

To keep your Tonka® Bubble Fire Truck working its best:

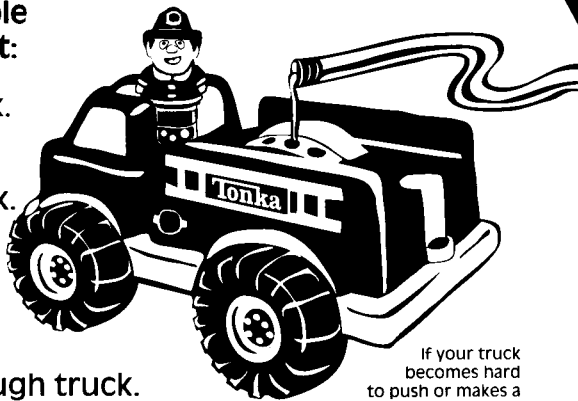

Remove ladder from truck.

Drain solution back into bottle by tilting truck back.

Run warm water through bubble wheel.

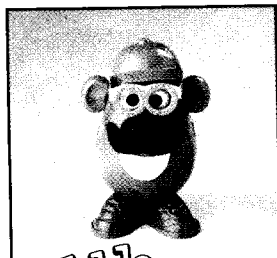

Rotate wheels a few turns to cycle warm water through truck.

Drain again and dry off with soft cloth.

If your truck becomes hard to push or makes a loud noise, run warm water through bubble wheel to loosen dried solution.
