

# Helios Training Lesson Plan

## **Presenter Setup**

- Firefox – user 6 - Contributor
- IE – user 5 - Approver
- Hasbro.com SKU 00622 (Monopoly Championship Edition)
- Power Point Deck

## **Power Point Deck**

### **Purpose of Training**

- Provide an overview of the Helios upgrade to version 2, live on Sept 8
- Describe and demonstrate key performance tasks

### **Training overview**

- 30 - 45 minutes long session
- WebEx Q & A during the presentation
- Short survey at the end of this training session - please complete

### **Helios purpose**

- Helios is the back end application that allows the Marketing organization to manage the product content of the Hasbro.com websites worldwide.

### **Key Helios 2 upgrade features**

- Improved interface that makes better use of larger screens
- Improved product filtering
- Improved product edit features
- Improved product search features
- Revised workflow and approval system for product edits
- Improved imagery functions
- “Learn More” links

## **Exit Power Point**

## **Open Helios - Firefox**

## **Helios Home Screen**

Helios Logo	Click to return to the Home screen from anywhere in Helios
Tool bar	Locale Tools, Work Queue
Maintenance Schedule	Maintenance information
News	Important information, tips, upcoming training
Helios Work Queue	Provides a quick view of your performance activities and tasks  Same content as in the Work Queue on the Tool Bar  Discuss <b>New Approval Process</b> (below)
Learn More Link	Discuss <b>Learn More Links</b> for helpful information Click the Home Screen Learn More Link to demo

## **New Approval Process**

Approval Process	2 step work flow approval process
Contributor	Person making an update to a product
Approver	Person approving the update made by a Contributor  Provides <b>2<sup>nd</sup> set of eyes</b> on all product updates
Benefit	Improve product update accuracy  Approver process allows contractors and agencies update content, then have a Hasbro employee approve update before it becomes public

## Locale Tools - Products

#### **Export to Excel**

- Located at the bottom of the Products screen
- Allows you to export the product list to Excel

#### **Product View Screen**

- Provides a view of all product information
- No edits can be done from this screen

## Actions to Add a Product to your Locale

### There are 2 methods to add a product to your locale

- Add a product from the Hasbro Master Products Database
- Clone a product from another locale to your locale (where you have rights)
- You will rarely need to add a product to your locale from scratch

### Add a product from the Hasbro Master Database (Show only, no full demo)

- Locale Tool – Products
- Confirm the locale you are adding the product to – **United States English**
- Click **Add Product to this Locale**
- Enter Product SKU, Product Planning Number, Product Licensed Item Number - click **Add**
- Work Queue – Contributor’s Queue – view the update
- Same Approval process that we have already discussed

### Clone a product to another locale

- Saves time when a product needs to be added to another locale
- Duplicate a product from one locale to another locale - this is a starting point, updates can be made to the product in the new locale as needed before adding to the locales product list
- You will have view access to all locales
- You will only be able to clone a product between locales that you have rights to
- Clone feature can be done from 3 locations in the Helios Product screen
  - Product screen Full Edit
  - Update Product screen
  - Product View screen

### Clone Product (Show only, no full demo)

- Canadian Mgr wants to clone a product from United States locale to Canada locale
- Clone **Monopoly Brand Electronic Banking**
- Products screen - select **United States English US** from the locale search dropdown
- Find Product – enter SKU **00114**
- Click **Edit** – Clone from the Update Product screen
- Show locale is English (US) - top of screen
- Clone to Locale – Click **Dropdown** - Select **Canada English** - Click **Clone**
- New Product -Canada English screen (Top Left Corner) – make any needed product updates
- Click **Add**
- Work Queue – Contributor’s Queue – view the update
- Same Approval process that we have already discussed
- Product cloned from United States English to Canada English
