Decorating Pony Star Catcher™

Thank you for purchasing Decorating Pony Star Catcher™! Please read these instructions thoroughly and carefully.

Ice Pens

Your pony comes with two (2) Ice Pens. Unscrew the Ice Pen caps, and fill the pens all the way to the top with water. Screw the caps back on.

Your pony changes color with changes in temperature:

- Cold temperature reveals the pony's colors;
- Warm temperature turns the pony white.

Put the Ice Pens in the freezer. Ask a grown-up for help! Be sure the Ice Pens are standing up in the freezer: do not lay them on their side! Also, do not put the Ice Pens in the freezer without the caps screwed on.

Once the water in the Ice Pens has turned completely to ice, take the Ice Pens out of the freezer: you're ready to decorate your pony!

NOTE: The pens will drip a little, as the ice melts.

Revealing the Pony's Colors

Apply the Ice Pens to the pony, and watch its colors "magically" appear! You could also reveal your pony's colors by leaving it in your freezer for about 5 minutes. Ask a grown-up for help!

Turning the Pony White

When the pony warms up, its color will turn back to white, so you can start decorating all over again!

Use a washcloth dampened with warm water to turn colored areas on your pony white again, or to get any hard-to-reach areas.

You can also style your pony's hair. Have fun!

NOTE: Do not use hot water or cleaning solutions on the pony.

WARNING:

CHOKING HAZARD—Small parts.
Not for children under 3 years.

Tips

Here are some neat tips to help you decorate your pony!

- Blow through a straw (not included) to decorate your pony! Where your pony has color, create spots or dots of white. The narrower the straw, the smaller the spots and dots!

- When you take an Ice Pen out of the freezer, let the ice inside melt a little bit: then use a straw (not included) to splatter the cold water drips on the pony, to make creative patterns!

- If your hands or fingers are warm enough, press them onto the pony to make patterns and designs in white!
