INSTRUCTION GUIDE

## SEARS TOWER

*At 1,450 ft. (442 meters), Chicago's Sears Tower has the honor of being North America's tallest skyscraper since 1974. Commissioned by Sears, Roebuck and Company, this spectacular work is that of Bruce Graham and Fazlur Khan, of the Skidmore, Owings & Merrill Group, a firm responsible for 13 of the 100 tallest buildings ever constructed.*

*It took just under two and a half years to build this immense steel structure clad in aluminum and tinted glass, whose surface totals 3,720,000 sq. ft. (345,600 sq.m). The building houses nine towers of varying heights, each harboring a surface of 5,600 sq. ft. (520 sq.m). Together, they form a monolithic block to the 49<sup>th</sup> floor -- the Sears head office once occupied this entire space. From there, the building gradually narrows to seven, five, and two towers at the 66<sup>th</sup>, 90<sup>th</sup> and 110<sup>th</sup> floors, respectively.*

*After 22 years as the world's tallest building, the Sears Tower relinquished the title in 1996 to the Petronas Towers of Kuala Lumpur, in Malaysia. These twin towers, 1,476 ft. (450 meters) tall, have only 88 floors. Therefore, the Sears Tower still holds the record for the building with the highest occupied floor.*

## ASSEMBLY INSTRUCTIONS FOR YOUR PUZZ-3D® ADVENTURE

### I. REMOVE AND SET ASIDE WASTE PIECES

 Pieces with red dots and/or red lines are not to be used in your puzzle. Frequently, puzzle pieces are still attached to red-dot pieces and it's easy to miss them. Careful: Not all waste pieces have red dots and/or red lines on them. Refer to the list of components (if applicable). Do not throw away any pieces marked with red dots and/or red lines until your puzzle is completed!

### 2. EXAMINE THE TYPES OF PUZZLE PIECES

 Jigsaw: These pieces have regular jigsaw cuts and are usually found in the middle sections of your Puzz-3D®.

 Square: These pieces have square cuts on one or more sides and are what make your Puzz-3D® three dimensional!

### 3. ASSEMBLE THE SECTIONS

Sort pieces according to color and design, then assemble them to form flat sections. In most cases, a finished section will generally have its perimeter made up of square cut pieces. Complete the sections with help from the technical drawings.

### 4. ASSEMBLE THE PUZZLE

Assemble your puzzle by referring to the technical drawings and by following the numerical steps.

### 5. HELPFUL HINTS

Handling the puzzle pieces may cause static electricity which could make them cling to your clothing. Keep your puzzle away from infants and pets. Note that the pieces are non-toxic. Intense heat such as radiators and the sun may cause warping and fading.

## SEARS TOWER

### This box contains:

- 532 Piece foam backed puzzle
- 6 Cardboard supports

### Dimensions:

36" x 7" x 7 1/2"  
91,44 cm x 17,78 cm x 19,05 cm

We guarantee the quality of our products. However, should you encounter any problems with missing pieces, simply send the technical drawing to the address below, with the area circled where the problem is occurring. Please include your name, address and telephone number (including area code).

For missing pieces contact:  
Wrebbit Inc. Consumer Service: P.O. Box 1714, Champlain, NY 12919-1714

For any other questions or comments about this puzzle:  
Hasbro Games, Consumer Affairs Dept., PO Box 200, Pawtucket, RI 02862. Tel: 888-836-7025 (toll free).
