CHANGING TO ROBOT

1. Begin with the car mode.
2. Transform the car into a robot by rotating the wheels and the head.
3. Adjust the body parts to form a complete robot.
4. Continue to adjust the limbs and arms to finalize the transformation.
5. Ensure all parts are securely attached.

NOTE: Some parts are made to detach if excessive force is applied, and are designed to be reattached if separation occurs. Adult supervision may be necessary for younger children.
