Welcome to the World of The TRANSFORMERS. A World of Heroic AUTOBOTS® and Evil DECEPTICONS® robots!

To change trailer truck into robot, follow these step-by-step instructions. Separate tractor from trailer. Rotate rear wheels (legs) straight down. Bend feet up. Turn fenders (arms) out to the sides. Rotate arms forward. Arms swivel at shoulders and elbows.

Apply labels as shown.

To assemble roller scout car, attach wheels (with large holes facing away from car) onto the posts on car chassis. Fit one end of the hose into nozzle, fit the other end of hose into gas pump. Fit post on gas pump into hole in car. To launch roller - Slide launcher back until it locks into place. Fit two rear posts on car into holes in launcher until car locks into place. Press lever to launch. Note: Press button to launch rockets.

To change back to trailer truck, reverse the order of the instructions.
